Motor Learning & Movement Analysis

- To explain what we mean by motor learning
- To consider key factors affecting motor learning
- To apply this knowledge to patient rehabilitation
- To review terms such as centre of gravity & base of support
- To analyse the relationship between line of gravity, BOS & key points of control and stability in different positions & during different movements

Wednesday 25th January 2012
09:00-10:00 - Lecture
