Dual electric vehicle charging point

Effective 1 September 2026

All EV charging sessions must be initiated using the Fuuse App. Please download the app and enter your payment details. Please open the Fuuse App and scan the QR code displayed on the charger to initiate charging. When charging is complete, use the app to end the charging session. Alternatively, unlock your vehicle and remove the charging cable. The charger will automatically release the cable and end the session.

All Pod Point charging units are reserved exclusively for Keele University-owned vehicles. These charging points are not available for staff, student, visitor, or other privately owned vehicles. Please use the designated public EV charging facilities where available.
