

Course Information Document: Undergraduate

For students starting in Academic Year 2017/2018

1. Course Summary

Names of programme(s) and award title(s)	BSc (Hons) Psychology with Counselling BSc (Hons) Psychology with Counselling with International Year (see Annex A for details)
Award type	Single Honours
Mode of study	Full time
Framework of Higher Education Qualification (FHEQ) level of final award	Level 6
Duration	3 years 4 years with International Year
Location of study	Keele University – main campus
Accreditation (if applicable)	<p>This programme is accredited by the British Psychological Society (BPS) as providing the Graduate Basis for Chartered Membership [GBC]. This is the first step towards becoming a Chartered Psychologist.</p> <p>Please note the following:</p> <p>Module Selection: It is a requirement of the BPS that the Final Year compulsory module PSY-30061 (Psychology Project) is passed and that students achieve a minimum standard of Second Class Honours for GBC.</p> <p>For further details see section 12.</p>
Regulator	Higher Education Funding Council for England (HEFCE)
Tuition Fees	<p>UK/EU students: Fee for 2017/18 is £9,250*</p> <p>International students: Fee for 2017/18 is £15,250**</p> <p>The fee for the international year abroad is calculated at 15% of the standard year fee</p>
Additional Costs	Refer to section 16

* These fees are regulated by Government. We reserve the right to increase fees in subsequent years of study in response to changes in government policy and/or changes to the law. If permitted by such change in policy or law, we may increase your fees by an inflationary amount or such other measure as required by government policy or the law. Please refer to the accompanying Student Terms & Conditions. Further information on fees can be found at <http://www.keele.ac.uk/studentfunding/tuitionfees/>

** We reserve the right to increase fees in subsequent years of study by an inflationary amount. Please refer to the accompanying Student Terms & Conditions for full details. Further information on fees can be found at <http://www.keele.ac.uk/studentfunding/tuitionfees/>

How this information might change: Please read the important information at <http://www.keele.ac.uk/student-agreement/>. This explains how and why we may need to make changes to the information provided in this document and to help you understand how we will communicate with you if this happens.

2. What is a Single Honours programme?

The Single Honours programme described in this document allows you to focus more or less exclusively on Psychology, with additional content relating to Counselling (delivered by staff in the School of Psychology). In keeping with Keele's commitment to breadth in the curriculum, the programme also gives you the opportunity to take some modules outside Psychology and Counselling, in other disciplines and in modern foreign languages as part of a 360-credit Honours degree. Thus it enables you to gain, and be able to demonstrate, a distinctive range of graduate attributes.

3. Overview of the Programme

Psychology is a large and varied discipline concerned with the systematic study of mind, brain and behaviour. Researchers in Psychology utilise a wide range of techniques in order to understand how people think, feel, communicate, and act. The Psychology with Counselling Programme at Keele covers psychological topics such as the biological bases of behaviour, cognition, individual differences, human social interaction and lifespan development. It also provides students with training in the skills required to conduct quantitative and qualitative investigation in psychology. Counselling is a related discipline of study, looking at ways of working therapeutically with clients to enable them to talk about issues and experiences which are of concern and importance to them, from an emotional and psychological perspective. The Psychology with Counselling Programme at Keele covers a range of theoretical approaches within Counselling, with a particular focus on the person-centred approach, and introduces students to the basic skills required by Counselling practitioners. For students taking an International Year, there are opportunities to learn about Psychology and Counselling in an international context.

4. Aims of the Programme

The broad aims of the programme are enable you to:

- develop systematic and scientific understanding of the core areas of psychology and counselling, and afford competence in subject-specific and graduate level intellectual skills that will meet the needs of students who wish to achieve accreditation by the British Psychological Society within the context of a Single Honours degree;
- facilitate the progressive development of critical thinking and independent learning and systematically apply these skills to specialist subject areas within the disciplines of psychology and counselling and in devising and answering empirical research questions;
- develop a range of graduate attributes that transfer across different disciplines and provide a solid foundation for both further study after graduation and a range of careers.

5. What you will learn

The intended learning outcomes of the programme (what students should know, understand and be able to do at the end of the programme), can be described under the following headings:

- Subject knowledge and understanding
- Subject specific skills
- Key or transferable skills (including employability skills)

Subject knowledge and understanding

Successful students will be able to demonstrate knowledge and understanding of:

- the scientific basis for the discipline of psychology;

- the theoretical basis for a range of approaches to counselling;
- the core areas of biological psychology, cognitive psychology, personality and individual differences, developmental psychology, social psychology and research methods;
- the inherent variability and diversity of psychological functioning;
- a range of influences on psychological functioning and a critical understanding of these influences along with their significance;
- several specialised areas of psychology in detail;
- application of psychological concepts to selected real-life problems;
- a range of research paradigms, methods and analyses;
- the ethical responsibilities of psychologists and counsellors.

Subject specific skills

Successful students will be able to demonstrate the following subject-specific skills:

- reason scientifically and critically about psychological and counselling theories, findings and research hypotheses;
- critically evaluate research literature in psychology and counselling and relate research issues to real life problems;
- detect meaningful patterns in behaviour and experience through the use of suitable research methods;
- pose, operationalise and critique psychological research questions;
- reason statistically and demonstrate competence using a range of statistical techniques;
- apply knowledge of ethical requirements to investigations;
- demonstrate an ability to use established techniques of analysis and enquiry accurately within psychology;
- communicate information to a specialist audience;
- produce a final year project report that follows the conventions of scientific report writing used by psychologists.
- key person-centred therapeutic skills.
- The ability to manage the therapeutic process when engaged in counselling skills practice with student peers.

Key or transferable skills (including employability skills)

Successful students will be able to demonstrate the following key/transferable skills:

- abstract information from a variety of primary and secondary sources and synthesise this information into a coherent understanding of the topic and practice within that topic area;
- assess the merit of contrasting theories and opinions making critical interpretations of data and text;
- critique the uncertainty, ambiguity and limits of psychological knowledge;
- develop a sufficient level of conceptual understanding to enable the development of arguments and analysis that comment on advanced scholarship at the forefront of some areas of psychology and counselling;
- apply their knowledge of a topic to identify a research question, initiate and carry out a project;
- effectively communicate ideas and research findings by written, oral and visual means;
- comprehend and use data effectively by interpreting complex sets of numerical, statistical and qualitative data;
- confidently demonstrate computer literacy by being able to word process, use email, the Internet, use databases and statistical software;
- solve problems by clarifying questions, considering alternatives and evaluating outcomes;
- work effectively within a group setting to achieve an end goal through pooled effort which involves recognizing and using appropriate material from others;
- undertake self-directed study and project management;

- take responsibility for their own learning and personal development by reflecting on their strengths and weaknesses, and identifying appropriate courses of action, in order to fulfil long-term ambitions;
- demonstrate enhanced interpersonal skills, including active listening and empathic understanding.

6. How is the Programme taught?

Learning and teaching methods used on the programme vary according to the subject matter and level of the module. They include the following:

- **Traditional lectures** where the lecturer provides students with a framework for reading and independent study. Some lecture classes may include video or audio presentations.
- **Tutorials and seminars** in small groups of around 15 students where key skills can be developed and issues central to the programme can be discussed in more depth. Students are expected to play a full part, and occasionally to lead, these discussions. Some seminars consist largely of student presentations.
- **Laboratory classes and workshops** involving larger classes in which students develop the basic practical skills necessary to conduct psychological research and explore ideas presented in lectures. In these sessions students will have the opportunity to work together in smaller groups, interact with the lecturer and reflect on their own learning.
- **Independent study** based on directed reading from textbooks, academic journals, and coursework materials.
- **Web-based learning** using the University's virtual learning environment (KLE). The KLE is used to give students easy access to a wide range of resources and research tools, and as a platform for online discussions, quizzes and blogs.
- **Experiential learning**, including practice counselling sessions with peers.
- In the final year students will have the opportunity to undertake a piece of **independent research** supervised and supported by a member of staff.

Apart from these formal activities, students are also provided with regular opportunities to talk through particular areas of difficulty, and any special learning needs they may have, with their Personal Tutors or module lecturers on a one-to-one basis.

These learning and teaching methods enable students to achieve the learning outcomes of the programme in a variety of ways. For example:

- Lectures and independent study allows students to gain a systematic understanding of psychological ideas and how they may be used in the course of seminars and tutorials to analyse a variety of contemporary psychological issues.
- Tutorials and seminars provide opportunities for students to ask questions about and discuss issues in psychology and to present their own ideas to members of staff and other students using an appropriate medium of communication.
- Laboratory classes and workshops allow students to develop their knowledge of how ideas in psychology can be researched and to apply the skills they have learned in order investigate psychological questions in a systematic and rigorous manner.
- Independent study and web-based activities encourage students to reflect on their own learning and take responsibility for its development by addressing areas of difficulty, perhaps by discussing them with their fellow students or by getting additional help from a member of staff.
- Undertaking a research project with the support of an experienced and active researcher allows students to formulate relevant research questions and devise a feasible and ethically sound strategy for answering them.
- Experiential learning, including practice sessions with peers, allows students to develop counselling skills, including active listening and empathic understanding.

7. Teaching Staff

Our current core teaching staff comprises highly qualified staff with specialist qualifications in Psychology and/or Counselling, plus Teaching Fellows. Most academic staff have doctorates (PhDs or the equivalent) in psychology or counselling and most hold (or are completing) qualifications in Teaching and Learning in Higher Education. Several members of current staff are Fellows of the Higher Education Academy, three are Senior Fellows and one is a Principal Fellow. All academic staff are active researchers and many have had work widely published. More information about Psychology Staff Members is available on the School website [<http://www.keele.ac.uk/psychology/people/>].

The University will attempt to minimise changes to our core teaching teams, however, delivery of the programme depends on having a sufficient number of staff with the relevant expertise to ensure that the programme is taught to the appropriate academic standard.

Staff turnover, for example where key members of staff leave, fall ill or go on research leave, may result in changes to the programme's content. The University will endeavour to ensure that any impact on students is limited if such changes occur.

8. What is the Structure of the Programme?

The academic year runs from September to June and is divided into two semesters. The number of weeks of teaching will vary from course to course, but you can generally expect to attend scheduled teaching sessions between the end of September and mid-December, and from mid-January to the end of April.

Our degree courses are organised into modules. Each module is usually a self-contained unit of study and each is usually assessed separately with the award of credits on the basis of 1 credit = 10 hours of student effort. An outline of the structure of the programme is provided in the tables below.

All standard taught modules are worth 15 credits except for the double Research Project module in Year 3, which is worth 30 credits.

Single Honours Psychology with Counselling students must take the compulsory modules shown in the table (330 credits). Students also have the option of choosing to take further (15 credit) Programme Approved Elective modules offered by the School of Psychology *shown in italics* or choosing from a range of elective modules offered by other schools.

Note 1: Students must accumulate 120 credits in each year of study. Where the full 120 credits cannot be accrued from Psychology modules, students must 'top-up' their credits by selecting an elective from a different programme.

Level 4 [Year 1]			
Semester	COMPULSORY MODULES		Credits
1	PSY-10033	Introduction to Developmental and Social Psychology	15
1	PSY-10036	Introduction to Research Design	15
1	PSY-10020	Natural, unnatural, supernatural: the psychology of unusual phenomena	15
2	PSY-10034	Introduction to Biological & Cognitive Psychology	15
2	PSY-10031	Introduction to Statistics for Psychology	15
2	PSY-10019	Introduction to Applied Psychology	15
1	PSY-10021	Understanding self and others better: an introduction to counselling theories	15
2	PSY-10026	Distress and Mental Health	15
		TOTAL	120
Level 5 [Year 2]			

Semester	COMPULSORY MODULES		Credits
1	PSY-20012	Developmental & Social Psychology	15
1	PSY-20013	Survey & Qualitative Research Methods	15
2	PSY-20005	Biological Psychology, Perception & Cognition	15
2	PSY-20018	Cognitive & Biological Research Methods	15
2	PSY-20023	Cognitive Neuroscience	15
1	PSY-20041	Person-centred counselling theory	15
2	PSY-20042	Issues and perspectives in counselling	15
	PROGRAMME APPROVED ELECTIVES (below) – students select ONE of the following modules in semester 2		
1	PSY-20038	Cognitive Development	15
1	PSY-20033	Psychopathology	15
1	PSY-20027	Psychology of Advertising	15
		TOTAL	120
Level 6 [Year 3]			
Semester	COMPULSORY MODULES		Credits
1+2	PSY-30061	Psychology Project	30
1	PSY-30099	Key Readings in Cognitive Psychology	15
2	PSY-30067	Individual Differences and Conceptual and Historical Issues in Psychology	15
2	PSY-30125	Culture and Psychology	15
1	PSY-30132	Counselling skills and perspectives	15
2	PSY-30133	Personal development in person-centred counselling	15
	PROGRAMME APPROVED ELECTIVES (below) – students select a maximum of one module in semester 1		
1	PSY-30127	Psychology in Education	15
1	PSY-30134	Making a Difference with Psychology	15
1	PSY-30126	The Psychology of Deviance	15
1	PSY-30124	Groups, Crowds and Conflict	15
1	PSY-30123	Faces, Forgetting and Forensic Psychology	15
1	PSY-30077	Health Psychology	15
		TOTAL	120

Note 1. At Level 6 the choice of Semester 1 elective modules may be limited by timetabling as certain modules will run at the same time.

The information above includes a selection of optional modules offered in 2016/17; however, the modules available may be subject to change for the following reasons:

- Staff availability – for example the availability of staff to deliver specialist modules, which cannot be delivered by staff who do not have the relevant specialist expertise
- Changes to external professional accreditation requirements
- In response to feedback and annual review processes to ensure we continually enhance our programmes. Changes in these circumstances will usually be made for the benefit of students

- Student demand – to ensure there are adequate numbers on a module to support the provision of an excellent Learning & Teaching experience.
- The currency of the relevant optional module. Some optional modules are specified at a time when they reflect the issues that are currently topical in the subject area. They may have lost that currency by the time that the student is required to exercise the option. In the circumstances, in order to ensure that students are provided with an appropriate learning experience, those modules will be replaced by those which are relevant to the changing nature of the subject area.

The University will endeavour to ensure that any impact on students is limited if such changes occur.

For further information on the content of modules currently offered please visit:

www.keele.ac.uk/recordsandexams/az

9. Final and intermediate awards

Credits required for each level of academic award are as follows:

Honours Degree	360 credits	You will require at least 120 credits at levels 4, 5 and 6 You must accumulate at least 255 credits in Psychology (out of 360 credits overall), with at least 60 credits in each of the three years of study, to graduate with a named single honours degree in Psychology with Counselling.
Diploma in Higher Education	240 credits	You will require at least 120 credits at level 4 or higher and at least 120 credits at level 5 or higher
Certificate in Higher Education	120 credits	You will require at least 120 credits at level 4 or higher

Psychology with Counselling with International Year: in addition to the above students must pass a non-credit bearing module covering the international year in order to graduate with a named degree in Psychology with Counselling with International Year. Students who do not complete, or fail the international year, will be transferred to the three-year Psychology with Counselling programme.

Note: The BPS requires that students undertake (and pass) an empirical study in order to qualify for GBC. This requirement is fulfilled by successfully achieving a 2:2 or better and passing the PSY-30061 Research Project module.

10. How is the Programme assessed?

The wide variety of assessment methods used within the School of Psychology at Keele reflects the broad range of knowledge and skills that are developed as you progress through the degree programme. Teaching staff pay particular attention to specifying clear assessment criteria and providing timely, regular and constructive feedback that helps to clarify things you did not understand and helps you to improve your performance. The following list is representative of the variety of assessment methods used within Psychology:

- Unseen, seen and open book examinations in different formats test students' knowledge of psychological theories and research, research methods and statistics. Examinations may consist of essay-based or multiple choice questions.
- Essays and Lab Reports test the quality and application of subject knowledge. In addition they allow students to demonstrate their ability to carry out basic independent research and to communicate their ideas effectively in writing in an appropriate scholarly style using the APA system of referencing.
- Class tests taken either conventionally or online via the Keele Learning Environment (KLE) assess students' subject knowledge and their ability to apply it in a more structured and focused way.

- Research projects and reports test student's knowledge of different research methodologies and the limits and provisional nature of psychological knowledge. They also enable students to demonstrate their ability to formulate research questions and to answer them using appropriate methods.
- Oral and poster presentations and reports assess individual students' subject knowledge and understanding. They also test their ability to work effectively as members of a team, to communicate what they know orally and visually, and to reflect on these processes as part of their own personal development.
- Critiques and Reviews of other scholars' work test students' ability to identify and summarise the key points of a text and to evaluate the quality of arguments and the evidence used to support them. In the case of work based on empirical research, reviews also assess students' knowledge of research methodologies and their ability to make critical judgements about the appropriateness of different strategies for collecting and analysing data.
- Practical assessments in Counselling modules enable students to demonstrate their developing skills in communication, active listening, building rapport and empathy.

Marks are awarded for summative assessments designed to assess your achievement of learning outcomes. You will also be assessed formatively to enable you to monitor your own progress and to assist staff in identifying and addressing any specific learning needs. Feedback, including guidance on how you can improve the quality of your work, is also provided on all summative assessments within three working weeks of submission, unless there are compelling circumstances that make this impossible, and more informally in the course of tutorial and seminar discussions.

11. Contact Time and Expected Workload

This contact time measure is intended to provide you with an indication of the type of activity you are likely to undertake during this programme. The data is compiled based on module choices and learning patterns of students on similar programmes in previous years. Every effort is made to ensure this data is a realistic representation of what you are likely to experience, but changes to programmes, teaching methods and assessment methods mean this data is representative and not specific.

Undergraduate courses at Keele contain an element of module choice; therefore, individual students will experience a different mix of contact time and assessment types dependent upon their own individual choice of modules. The figures below are an example of activities that a student may expect on your chosen course by year/stage of study. Contact time includes scheduled activities such as: lecture, seminar, tutorial, project supervision, demonstration, practical classes and labs, supervised time in labs/workshop, fieldwork and external visits. The figures are based on 1,200 hours of student effort each year for full-time students.

Activity	Year 1 (Level 4)	Year 2 (Level 5)	Year 3 (Level 6)
Scheduled learning and teaching activities	16%	21%	15%
Guided independent Study	84%	79%	85%
Placements	0%	0%	0%

12. Accreditation

This programme is accredited by the British Psychological Society (BPS) as providing the Graduate Basis for Chartered Membership [GBC]. This is the first step towards becoming a Chartered Psychologist.

Please note the following:

Module Selection: It is a requirement of the BPS that the Final Year compulsory module PSY-30061 (Psychology Project) is passed and that students achieve a minimum standard of Second Class Honours for GBC.

13. Regulations

The University Regulations form the framework for learning, teaching and assessment and other aspects of the student experience. Further information about the University Regulations can be found at: <http://www.keele.ac.uk/student-agreement/>

14. What are the typical admission requirements for the programme?

Subject	A-level	Subjects not included	International Baccalaureate	BTEC	Access to Higher Education Diploma	GCSE requirements
Psychology with Counselling	ABC/BBB	General Studies and Critical Thinking	32 points	DDM	Obtain Access to Higher Education Diploma with 30 Level 3 credits at Distinction.	Maths at C (or 4) English Language at C (or 4)

Applicants who are not currently undertaking any formal study or who have been out of formal education for more than 3 years and are not qualified to A-level or BTEC standard may be offered entry to the University's Foundation Year Programme. The Foundation Year includes a module specifically aimed at students intending to go on to study Psychology.

Applicants for whom English is not a first language must provide evidence of a recognised qualification in English language. The minimum score for entry to the Programme is Academic IELTS 6.0 or equivalent.

Please note: All non-native English speaking students are required to undertake a diagnostic English language assessment on arrival at Keele, to determine whether English language support may help them succeed with their studies. An English language module may be compulsory for some students during their first year at Keele.

Accreditation of Prior Learning (APL) is considered on a case-by-case basis and those interested should contact the Programme Director. The University's guidelines on this can be found here: <http://www.keele.ac.uk/qa/accreditationofpriorlearning/>

15. Other learning opportunities

Study abroad (semester)

Unfortunately, it is not possible to study abroad for a semester when taking this programme.

Students may however study for an International Year (see below).

Study Abroad (International Year)

A summary of the International Year, which is a potential option for students after completion of year 2 (Level 5), is provided at Annex A.

Other opportunities

During their time at Keele, students also have the opportunity to hear from, and talk to, a range of guest speakers who are invited by the School to present the findings from up-to-date research they are currently carrying out in their own area of psychology.

16. Additional costs

Additional costs may be incurred where a student elects to take a module requiring off-campus travel. It may also be possible for a student to design a final year project (PSY-30061) that requires off-campus travel, and occasionally final year projects incur additional expenses for students in other forms.

As to be expected there will be additional costs for inter-library loans and potential overdue library fines, print and graduation.

These costs have been forecast by the University as accurately as possible but may be subject to change as a result of factors outside of our control (for example, increase in costs for external services). Forecast costs are reviewed on an annual basis to ensure they remain representative. Where additional costs are in direct control of the University we will ensure increases do not exceed 5%.

We do not anticipate any further costs for this undergraduate programme.

Annex A

Psychology with Counselling with International Year

International Year Programme
<p>Students registered for Single Honours Psychology with Counselling may either be admitted for or apply to transfer during their period of study at Level 5 to the Single Honours 'Psychology with Counselling with International Year'. Students accepted onto this programme will have an extra year of study (the International Year) at an international partner institution after they have completed Year 2 (Level 5) at Keele.</p> <p>Students who successfully complete both the second year (Level 5) and the International Year will be permitted to progress to Level 6. Students who fail to satisfy the examiners in respect of the International Year will normally revert to the BSc (Hons) Psychology with Counselling and progress to Level 6 on that basis. The failure will be recorded on the student's final transcript.</p> <p>Study at Level 4, Level 5 and Level 6 will be as per the main body of this programme specification. The additional detail contained in this annex will pertain solely to students registered for 'Psychology with Counselling with International Year'.</p>
International Year Programme Aims
<p>In addition to the programme aims specified in the main body of the programme specification, the international year programme of study aims to provide students with:</p> <ol style="list-style-type: none">1. Personal development as a student and a researcher with an appreciation of the international dimension of their subject2. Experience of a different culture, academically, professionally and socially
Entry Requirements for the International Year
<p>Students may apply to the 4-year programme during Level 5. Admission to the International Year is subject to successful application, interview and references from appropriate staff.</p> <p>The criteria to be applied are:</p> <ul style="list-style-type: none">• Academic Performance (an average of 60% across all modules at Level 5 is normally required)• General Aptitude (to be demonstrated by application for study abroad, interview during the 2nd semester of year 2 (Level 5), and by recommendation of the student's personal tutor, 1st and 2nd year tutors and programme director)
Student Support
<p>Students will be supported whilst on the International Year via the following methods:</p> <ul style="list-style-type: none">• Phone or Skype conversations with Study Abroad tutor, in line with recommended Personal Tutoring meeting points.• Support from the University's Global Education Team
Learning Outcomes
<p>In addition to the learning outcomes specified in the main text of the Programme Specification, students who complete a Keele undergraduate programme with International Year will be able to:</p> <ol style="list-style-type: none">i) Describe, discuss and reflect upon the cultural and international differences and similarities of different learning environments

- ii) Discuss the benefits and challenges of global citizenship and internationalisation
- iii) Explain how their perspective on their academic discipline has been influenced by locating it within an international setting.

In addition, students who complete 'Psychology with Counselling with International Year' will be able to:

- iv) be able to communicate effectively in an international setting;
- v) be able to reflect on previous learning within an international context.

These learning outcomes will all be assessed by the submission of a satisfactory individual learning agreement, the successful completion of assessments at the partner institution and the submission of the reflective portfolio element of the international year module.

Course Regulations

Students registered for the 'Psychology with Counselling with International Year' are subject to the course specific regulations (if any) and the University regulations. In addition, during the International Year, the following regulations will apply:

Students undertaking the International Year must complete 120 credits, which must comprise *at least 40%* in the student's discipline area.

This may impact on your choice of modules to study, for example you will have to choose certain modules to ensure you have the discipline specific credits required.

Students are barred from studying any Psychology or Counselling module with significant overlap to Level 6 modules to be studied on their return. Significant overlap with Level 5 modules previously studied should also be avoided.

Additional costs for the International Year

Tuition fees for students on the International Year will be charged at 15% of the annual tuition fees for that year of study, as set out in Section 1. The International Year can be included in your Student Finance allocation, to find out more about your personal eligibility see: www.gov.uk

Students will have to bear the costs of travelling to and from their destination university, accommodation, food and personal costs. Depending on the destination they are studying at additional costs may include visas, study permits, residence permits, and compulsory health checks. Students should expect the total costs of studying abroad be greater than if they study in the UK, information is made available from the Global Education Team throughout the process, as costs will vary depending on destination.

Students studying in Erasmus+ destinations may be eligible for grants as part of this programme. Students studying outside of this programme may be eligible income dependent bursaries at Keele.

Students travel on a comprehensive Keele University insurance plan, for which there are currently no additional charges. Some Governments and/or universities require additional compulsory health coverage plans; costs for this will be advised during the application process.
