

## **Student Movement.**

To allow safe movement around the building Staff will be asked to avoid the routes used by students during the class changeover period. Mobile device usage will not be allowed while in transit to the teaching space. 2m spacing will be adhered at all times.

Students will only be allowed to enter the building for timetabled classes, any other access will have to be authorised and booked through the relevant GGE Staff. Timetabling will set a longer than normal changeover period between classes to minimize cross over.

Before the timetabled class is due to begin students will be required to wait in a safely spaced manner outside the building before being ushered to the designated laboratory space. This will be clearly marked. The route used will be the shortest possible bypassing the system in place for staff, at the end of the class they will be ushered out of the building by the shortest route. These routes are marked out in the WS Teaching rooms Direction plan. Normal staff building rotation will resume once the students are in class. Designated entrances and exits will be clearly marked and must be used where available, in areas where this is not possible timetabling will give greater time between classes to allow safe change over.

In the event of an emergency students will exit the building using standard H&S protocols.

## **Student Lab Usage**

All working areas will be marked at 2m distance to achieve 25% room occupancy, classes must not exceed stated occupancy. Room occupancy capacities are available in the separate WSB Teaching Room Occupancy document. Greater capacity may be achievable if 1m+ distancing is used. For this to happen students will be required to use FNS supplied Face visors and Masks.

Students will be required to clean the desk space allocated before and at the end of each class. Cleaning materials will be provided.

Students will be mandated to wear visors and masks in all in person teaching where 2m+ is not practicable. This is likely to be the case in CSL building. Where a student is not able to wear the appropriate PPE for medical reasons the student will need to raise this via student services and a specific PEEP will be put in place by technical staff.

In all cases where a student has an EDI issue a specific arrangement will be made.
