

EV-PRESS MAIL

Your local service for cell-cell communication!

EV-press Mail devotes itself to extracellular vesicle (EV) delivery to neighbouring cells. Pack your EVs with cargo suitable to combat disease states, just as if you (the cell) had gone yourself!

Getting the message across quicker than cell phones!

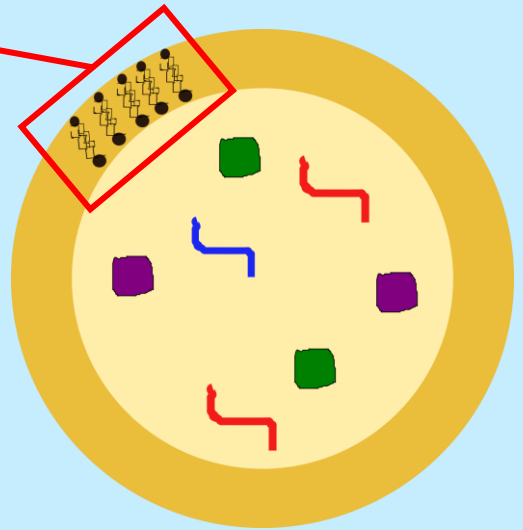

Lipid Membrane Packaging!

Acceptable Cargo:

- Protein
- RNA (incl. miRNA)

Great range of sizes:

- Apoptotic bodies (1-5um)
- Microvesicles (100-1000nm)
- Exosomes (0-200nm)

Delivered exclusively by our patented cell cycles!
