

T2T Participant Newsletter

Seasonal Wishes from the T2T in Gout Trial

We continue to focus on making sure that participants are being followed up by their practice so that we can collect all the information we need.

If you are unable to attend an appointment, please let your practice know and they can rearrange it.

If you miss your appointment, we have a new procedure where a member of the study team can contact you to arrange for you to complete your questionnaire.

Let us know if:

- You change practice or address during your participation in the study, so that we can update your information.
- You have had a gout flare by reporting it via your chosen method – please continue to report flares AFTER your 2 year follow up appointment.
- You would like to share your experiences of taking part in the study. If you have any questions or concerns about taking part in the study, please contact the Trial Manager (details below).

What's going on this year?

We are nearing the point where more participants will be completing the study, so be sure to keep an eye out for your 'thank you' letter in the post. In May, all participants will have passed the 1 year follow up in the study. As

mentioned above, if you are unable to attend your appointment, please let your practice know.

As always, we greatly appreciate your ongoing support, as the data we receive from both usual care and treat-to-target participants is invaluable.
