Today Science Club are going to be.....

## Looking at TECHNOLOGY!

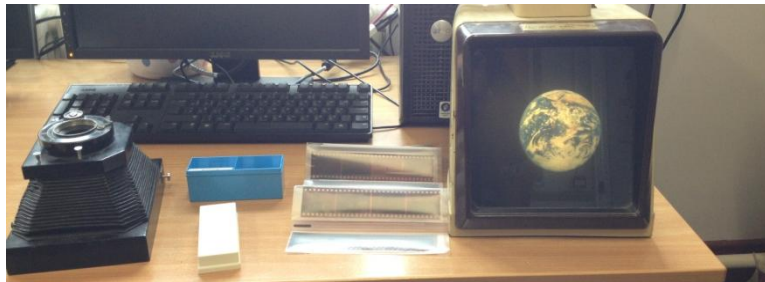

Technology began with people making simple tools – see the axeheads from the Museum!

Then went on to the invention of the wheel!

We will now be looking at technology that were around when your parents were young:

 Tick the boxes to say which technology is around **now**, tick when there were around when your **mum and dad** were children, and tick which were around when your **grandparents** were children.

	<b>Now</b>	<b>Mum &amp; Dad children (20yrs ago)</b>	<b>Grandparents children (30- 50yrs ago)</b>
<b>Flying cars</b>			
<b>Computers</b>			
<b>Xbox/playstation</b>			
<b>TV</b>			
<b>Mobile phone</b>			
<b>SATNAV</b>			

 Many of you have a **printer** at home. These print in **2D** so they are **flat**. Today we have a printer that prints **3D** which gives **solid shapes**. They sent one to the International Space Station to make spares!

**Note to parents:** We have been looking at old technology so your budding scientists may be asking you to get out your old walkmans etc! Any questions please email: [HassellScienceClub@gmail.com](mailto:HassellScienceClub@gmail.com)

## Technology Quiz

Put when you think the following technologies were invented on the AD year time-line:

Computer, Telephone, Bicycle, Email, Writing paper, Toilet paper, Manufactured Pencil, Television, Car, Postage stamp, Internet
