

Programme Specification: Post Graduate Taught For students starting in Academic Year 2023/24

1. Course Summary

Names of programme and award title(s)	MSc Advanced Physiotherapy MSc Advanced Physiotherapy (Cardio-respiratory) MSc Advanced Physiotherapy (Musculoskeletal) MSc Advanced Physiotherapy (Neurology)
Award type	Taught Masters
Mode of study	Modular Part-time
Framework of Higher Education Qualification (FHEQ) level of final award	Level 7
Normal length of the programme	Modular students have up to 5 years to achieve a Masters award following initial registration Part time students have up to 3 years to achieve a Masters award following initial registration
Maximum period of registration	The normal length as specified above plus 3 years
Location of study	Keele Campus
Accreditation (if applicable)	Not applicable
Regulator	Office for Students (OfS)
Tuition Fees	UK students: Part-time fee for 2023/24 is £4,900 per year*

How this information might change: Please read the important information at http://www.keele.ac.uk/student-agreement/. This explains how and why we may need to make changes to the information provided in this document and to help you understand how we will communicate with you if this happens.

2. Overview of the Programme

Physiotherapy is a constantly evolving profession which requires practitioners to demonstrate current best practice and continued professional development at postgraduate level. The philosophy of this course is to broaden the field of physiotherapy and encourage personal and professional development. The programme routes are designed to provide an opportunity for students to question and challenge current practice in aspects of physiotherapy and to enable students to explore in depth areas of professional interest. It also aims to enable students to evaluate evidence both for current practice and for new approaches in physiotherapy practice.

The structure of the compulsory modules for the various pathways through this route meets the needs of individuals to review and evaluate the background of the physiotherapy profession and to integrate this into their clinical practice where appropriate. The optional modules allow students to devise a programme to suit their own specific requirements in terms of professional and personal development. The research module in health and the dissertation, together with compulsory / optional modules such as Evidence Based Practice,

^{*} We reserve the right to increase fees in subsequent years of study by an inflationary amount. Please refer to the accompanying Student Terms & Conditions for full details. Further information on fees can be found at http://www.keele.ac.uk/studentfunding/tuitionfees/

and Assessment and Measurement develop the students' research capabilities and critical evaluation skills.

The clinical pathway options offered are responsive to the dynamic health and social care agenda and specific named awards are:

MSc: Advanced Physiotherapy

MSc Advanced Physiotherapy (Cardio-respiratory)

MSc Advanced Physiotherapy (Musculoskeletal)

MSc Advanced Physiotherapy (Neurology)

Each pathway is designed to develop and enhance the advancing physiotherapy practitioner's application of specialist theory to their named practice area and new pathways can be developed as demand requires.

In your programme you may sometimes be expected to role play and engage in simulated clinical scenarios with other students, such as the practice and observation of practical skills in physical contact with other students. For some specific practices, this may necessitate modification of dress - e.g., to shorts and t-shirt. These activities will be conducted in a professional, safe, respectful and culturally sensitive way, under the supervision of academic staff, according to a defined protocol.

3. Aims of the programme

The aims of the programme are to:

- provide an environment where the student is supported and motivated to develop academically, professionally and personally
- promote reflective thinking, reflective practice, and self-evaluation
- develop the process of critical and evaluative thinking, writing, and communication
- transfer scientific knowledge from theory into practice
- develop research skills
- provide students with an advanced academic core to their clinical practice in physiotherapy
- develop a scientific approach to the evaluation of current practice in physiotherapy
- promote interdisciplinary perspectives and an holistic approach to the management and rehabilitation of persons

4. What you will learn

The programme provides opportunities for students to develop and demonstrate subject knowledge and understanding, subject-specific skills, qualities and other attributes, including skills which are transferable beyond the programme.

Students who successfully complete the programme will be able to:

Subject knowledge and understanding

Successful students will be able to:

- demonstrate capacity for critical enquiry, analysis of arguments, and critical evaluation of research literature and other sources of evidence
- evaluate knowledge and understanding of the core scientific principles and concepts of physiotherapy practice
- question the professional concepts and contextual frameworks and challenge underlying assumptions and established principles in physiotherapy practice
- transfer scientific knowledge from theory into practice

Subject specific skills

Successful students will be able to:

- demonstrate an understanding of the research process and evidence based practice
- evaluate knowledge and understanding of the core scientific principles and concepts on which physiotherapy is based
- question the professional concepts and contextual frameworks, challenge underlying assumptions and

- established principles of physiotherapy knowledge base
- integrate core scientific knowledge with the professional practice of physiotherapy
- challenge, evaluate, modify, develop the theory and the practice of physiotherapy
- demonstrate capacity for critical enquiry, analysis of arguments, hypothesis, judgement of research literature

For Master's students ONLY

 plan, implement and document a piece of original research addressing ethical and professional issues as appropriate

Key or transferable skills (including employability skills)

Successful students will be able to:

- communicate effectively with a wide range of individuals using a variety of means
- · evaluate own academic, professional and health care practice
- practice and promote continuing professional development (CPD)
- take responsibility for personal and professional learning and development
- identify own learning needs and means of achieving them
- enhance, update and develop appropriate knowledge and skills, balancing own needs with available resources
- share and disseminate personal knowledge and skills gained to colleagues
- develop information management skills e.g. IT skills

Keele Graduate attributes

Engagement with this programme will enable you to develop your intellectual, personal and professional capabilities. At Keele, we call these our ten Graduate Attributes and they include independent thinking, synthesizing information, creative problem solving, communicating clearly, and appreciating the social, environmental and global implications of your studies and activities. Our educational programme and learning environment is designed to help you to become a well-rounded graduate who is capable of making a positive and valued contribution in a complex and rapidly changing world, whichever spheres of life you engage in after your studies are completed.

Further information about the Keele Graduate Attributes can be found here: http://www.keele.ac.uk/journey/

5. How is the programme taught?

Learning and teaching methods used on the Programme vary according to the subject matter and nature of the module. Numbers of students attending any module vary, but normally the maximum would be 50 and the minimum six, thus much work is, in effect, undertaken in small groups. Methods include the following:

- traditional lectures where the lecturer provides students with a framework and context for further reading and independent study; some lectures may feature guest speakers who are clinicians, active researchers, and academics in the field of physiotherapy
- small group workshops when students work together to, for example, critically appraise papers relating to some aspect of physiotherapy, then sharing of group summaries in a final plenary session
- seminar presentations where students research and present a topic of current clinical relevance, for example evidence for the effectiveness of a specific approach to the management of a patient with stroke, to the whole group with time allowed for interactive questions and discussion
- student and tutor-led tutorials which encourage topics of interest and relevance to a module to be discussed in depth within a small group; problem-solving scenarios and case studies may be used as a vehicle for such discussion
- practical work in selected modules allows students to observe the application of, or develop the learning of new practical skills (for example, gait analysis, electrical stimulation, acupuncture, injection, manual therapy) under close supervision of expert practitioners and academics
- web-based learning using the university's virtual learning environment (KLE): this is used by all modules
 and provides a platform for students to share online discussions and 'blogs', and conditional released
 tasks, and to access a wide range of learning resources and research tools; one module (EvidenceBased Practice) is delivered entirely online via the KLE
- independent study will form a significant component of each module for all students studying at level 7; some study will be guided by tutors where necessary, but will also be self-directed in relation to the various demands of each module and its assessment, and may be facilitated by use of various resources such as study-packs; development of portfolios will also be used as a vehicle for learning
- independent study also forms an important part of the dissertation process which is supported by tutor and student-led workshops throughout, also by one-to-one supervision of the process by a member of

- the academic staff
- for students requesting recognition of prior learning, an advisory tutorial is offered

Apart from these formal activities, students are also provided with regular opportunities to talk through particular areas of difficulty, and any special learning needs they may have, with their Academic Mentors or module lecturers on a one-to-one basis.

These learning and teaching methods enable students to achieve the learning outcomes of the programme in a variety of ways. For example:

- lectures and independent study enable students to broaden and deepen their existing professional knowledge and understanding of the core scientific principles and concepts of physiotherapy practice, and to transfer scientific knowledge from theory into practice
- guided independent study, tutorials and the use of portfolios will assist the student to explore in depth a chosen aspect of professional practice in the field of physiotherapy, and evaluate aspects of relevant professional practice
- small group work, such as seminars, and workshops, provide opportunities for students to clarify and exchange ideas, and to question and challenge professional concepts and contextual frameworks underlying assumptions and established principles in physiotherapy practice
- seminars, tutorials and web-based activities encourage students to reflect upon their learning and to take responsibility for its development, and to collaborate with others to share, explore, and evaluate ideas in greater depth
- practical work enables students to develop, enhance and update their learning of new skills under the supervision of experts and to ensure safe and competent practice where relevant, and to integrate theoretical and practical knowledge
- undertaking a research-based dissertation, using the support of small group workshops and tutorial supervision, further develops the student's independent learning and research capability; it also enables the student to plan, implement and document a piece of original research related to some aspect of physiotherapy practice; facility with IT skills including use of software packages for data analysis will also be supported during workshops and tutorials.

6. Teaching Staff

The permanent teaching staff on the programme consist of professors, senior lecturers, lecturers and teaching fellows. The majority of members of staff have postgraduate qualifications (some masters and some doctoral) in disciplines related to healthcare, rehabilitation, bioengineering, or education. Several members are involved in clinical practice. Additionally, all staff have professional qualifications and if appropriate are also registered with the Health and Care Professions Council. Most staff are active researchers, and research has led to publication in national and international journals. Most lecturers are fellows of the Higher Education Academy. The staff group all have extensive experience of teaching and examining at postgraduate level. Some staff are members of nationally and internationally recognized specialist groups such as the Musculoskeletal Association of Chartered Physiotherapists (MACP) and the Association of Chartered Physiotherapists in Neurology (ACPIN).

Guest speakers, who are often leaders in their field, and have national and international reputations, are frequently invited to contribute to a range of modules.

The University will attempt to minimise changes to our core teaching teams, however, delivery of the programme depends on having a sufficient number of staff with the relevant expertise to ensure that the programme is taught to the appropriate academic standard.

Staff turnover, for example where key members of staff leave, fall ill or go on research leave, may result in changes to the programme's content. The University will endeavour to ensure that any impact on students is limited if such changes occur.

7. What is the structure of the programme?

A summary of the credit requirements is a follows:

Year	Compulsory	Optional Elective		/es	
	Compaisory	Min Max N	Min	Max	
Level 7	105	75	75	0	0

Level 7

Compulsory modules	Module Code	Credits	Period
Research methods in health	HLT-40001	15	Semester 1
Physiology of the Neuromusculoskeletal Tissue	PTY-40005	15	Semester 1
Applied Clinical Anatomy 1	PTY-40033	15	Semester 1
Masters Dissertation in Faculty of Health	PTY-40044	60	Year 1

Optional modules	Module Code	Credits	Period
Clinical Leadership	NUR-40042	15	Semester 1
Psychosocial aspects of pain	PTY-40011	15	Semester 1
Independent study	PTY-40016	15	Semester 1
Acute respiratory deterioration and critical care	PTY-40056	15	Semester 1
Introduction to Clinical Education	PAR-40033	15	Semester 1-2
Assessment in Clinical Education	PAR-40035	15	Semester 1-2
Evidence-based practice	PTY-40002	15	Semester 1-2
Leadership and Management for Healthcare Professionals	CLM-40104	15	Semester 2
Clinical Leadership	NUR-40042	15	Semester 2
Independent study	PTY-40016	15	Semester 2
Applied Clinical Anatomy 2	PTY-40030	30	Semester 2
Dynamic Ultrasound Imaging	PTY-40034	15	Semester 2
Assistive Technologies in Neuromuscular Rehabilitation	PTY-40035	15	Semester 2
Behaviour Change For Health and Well- Being	PTY-40053	15	Semester 2
Musculoskeletal Management at the Interface	PTY-40029	30	Year
Principles and practice of joint and soft tissue injection	PTY-40102	30	Year

Level 7 Module Rules

Optional module choices are set out in the table below

MSc Advan	ced Physiotherapy	
	PGCert [60 credits]	
Compulsory modules (1, 2 and 3)	HLT-40001 Research Methods in Health PTY-40033 Applied Clinical Anatomy 1 PTY-40005 Physiology of the Neuromusculoskeletal Tissue	45 credits
Optional module (4)	PTY-40002 Evidence Based Practice OR PTY-40072 Behaviour Change for Health and Well-Being	15 credits
	PGDip [120 credits]	
Optional module (5)	Leadership/Management and / or Education from Faculty of Medicine and Health Sciences provision. CLM-40104 LEADERSHIP AND MANAGEMENT FOR HEALTHCARE PROFESSIONALS CLM-40002 MEDICAL EDUCATION NUR-40042 CLINICAL LEADERSHIP	15 Credits
Optional module (6)	PTY-40002 Evidence Based Practice OR PTY-40072 Behaviour Change for Health and Well-Being	15 Credits
Optional modules (7 and 8)	30 credits of ANY other optional/elective module* from the School of Allied Health Professions, Faculty of Medicine and Health Sciences or other relevant University Modules	45 credits
	MSc Advanced Physiotherapy [180 credits]	
Dissertation	PTY-40044 - Research Dissertation Dissertation Module Students successful in the Postgraduate Diploma stage can proceed on to the dissertation stage and will be required to submit a research-based dissertation. The dissertation is expected to be a significant piece of work and we encourage you to consider aiming for publication of your findings	60 Credits

MSc Advanced Physiotherapy (Cardio-Respiratory)

	PGCert [60 credits]	
Compulsory modules (1, 2 and 3)	HLT-40001 Research Methods in Health PTY-40033 Applied Clinical Anatomy 1 PTY-40005 Physiology of the Neuromusculoskeletal Tissue	45 credits
Optional module (4)	PTY-40056 Acute Respiratory Deterioration and Critical Care	15 credits
	PGDip [120 credits]	
	Leadership/Management and / or Education from Faculty of Medicine and Health Sciences provision.	
Optional module (5)	CLM-40104 LEADERSHIP AND MANAGEMENT FOR HEALTHCARE PROFESSIONALS	15 credits
	CLM-40002 MEDICAL EDUCATION	
	NUR-40042 CLINICAL LEADERSHIP	
Optional module (6)	PTY-40056 Acute Respiratory Deterioration and Critical Care	15 credits
Optional modules (X2)	30 credits of ANY other optional/elective module* from the School of Allied Health Professions, Faculty of Medicine and Health Sciences or other relevant University Modules	30 credits
	MSc Advanced Physiotherapy (Cardio-Respiratory) [180 credits]	
DISSERTATION	PTY-40044 - Research Dissertation Dissertation Module Students successful in the Postgraduate Diploma stage can proceed on to the dissertation stage and will be required to submit a research-based dissertation. The dissertation is expected to be a significant piece of work and we encourage you to consider aiming for publication of your findings	60 Credits

MSc Advanced Physiotherapy (Neurology)

	PGCert [60 credits]	
Compulsory modules (1, 2 and 3)	HLT-40001 Research Methods in Health PTY-40033 Applied Clinical Anatomy 1 PTY-40005 Physiology of the Neuromusculoskeletal Tissue	45 credits
Optional module (4)	PTY-40035 Assistive Technologies in Neuromuscular Rehabilitation	15 Credits
	PGDip [120 credits]	
Optional module (5)	Leadership/Management and / or Education from Faculty of Medicine and Health Sciences provision. CLM-40104 LEADERSHIP AND MANAGEMENT FOR HEALTHCARE PROFESSIONALS CLM-40002 MEDICAL EDUCATION NUR-40042 CLINICAL LEADERSHIP	30 credits
Optional module	PTY-40035 Assistive Technologies in Neuromuscular Rehabilitation	15 credits
Optional modules (7 and 8)	30 credits of ANY other optional/elective module* from the School of Allied Health Professions, Faculty of Medicine and Health Sciences or other relevant University Modules	30 credits
	MSc Advanced Physiotherapy (Neurology) [180 credits]	
Dissertation	PTY-40044 - Research Dissertation Dissertation Module Students successful in the Postgraduate Diploma stage can proceed on to the dissertation stage and will be required to submit a research-based dissertation. The dissertation is expected to be a significant piece of work and we encourage you to consider aiming for publication of your findings	60 Credits

MSc Advanced Physiotherapy (Musculoskeletal)

	PGCert [60 credits]	
Compulsory modules (1, 2 and 3)	HLT-40001 Research Methods in Health PTY-40033 Applied Clinical Anatomy 1 PTY-40005 Physiology of the Neuromusculoskeletal Tissue	45 credits
Optional modules (4)	PTY-40011 Psychosocial aspects of pain	15 Credits
	PGDip [120 credits]	
Optional module 5 (x1)	Leadership/Management and / or Education from Faculty of Medicine and Health Sciences provision. CLM-40104 LEADERSHIP AND MANAGEMENT FOR HEALTHCARE PROFESSIONALS CLM-40002 MEDICAL EDUCATION NUR-40042 CLINICAL LEADERSHIP	15 credits
Optional module 6 (X1)	PTY-40011 Psychosocial aspects of pain	15 credits
Optional module 7 and 8 (X2)	30 credits of focused musculoskeletal from ANY optional/elective modules from the School of Allied Health Professions or other relevant Faculty of Medicine and Health Sciences or University modules.	30 credits
	MSc Advanced Physiotherapy (Musculoskeletal) [180 credits]	
Dissertation	PTY-40044 - Research Dissertation Dissertation Module Students successful in the Postgraduate Diploma stage can proceed on to the dissertation stage and will be required to submit a research-based dissertation. The dissertation is expected to be a significant piece of work and we encourage you to consider aiming for publication of your findings	60 Credits

*Elective Modules:

There is an extensive range of further possible elective module choices; examples available to you within the Faculty of Medicine and Health Sciences and the wider University can be located here: https://www.keele.ac.uk/health/postgraduate/individualmodules/

You can select appropriate elective modules from the University or external Institutions (up to 60 credits) which must be agreed by the Programme Lead / RPL Co-ordinator.

Learning Outcomes

The table below sets out what students learn in the programme and the modules in which that learning takes place. Details of how learning outcomes are assessed through these modules can be found in module specifications.

Level 7

Subject Knowledge and Understanding		
Learning Outcome	Module in which this is delivered	
Demonstrate capacity for critical enquiry, analysis of arguments, and critical evaluation of research literature and other sources of evidence	Research methods in health - HLT-40001	
Evaluate knowledge and understanding of the core scientific principles and concepts of physiotherapy	Applied Clinical Anatomy 1 - PTY-40033 Physiology of the Neuromusculoskeletal Tissue - PTY-40005 Acute respiratory deterioration and critical care - PTY-40056 Independent Study Other clinically based modules	
Question the professional concepts and contextual frameworks and challenge underlying assumptions and established principles in physiotherapy practice	Assistive Technologies in Neuromuscular Rehabilitation - PTY-40035 Evidence-based practice - PTY-40002 Independent Study	
Transfer scientific knowledge from theory into practice	Physiology of the Neuromusculoskeletal Tissue - PTY-40005 Applied Clinical Anatomy 1 - PTY-40033 Applied Clinical Anatomy 2 - PTY-40030	

Subject Specific Skills		
Learning Outcome	Module in which this is delivered	
Demonstrate an understanding of the research process and evidence based practice	Research methods in health - HLT-40001 Masters Dissertation in Faculty of Health - PTY- 40044 Evidence-based practice - PTY-40002	
Demonstrate capacity for critical enquiry, analysis of arguments, hypothesis, judgement of research literature	Research methods in health - HLT-40001 Masters Dissertation in Faculty of Health - PTY- 40044 Evidence-based practice - PTY-40002	
Evaluate knowledge and understanding of the core scientific principles and concepts on which the practice of physiotherapy is based	Applied Clinical Anatomy 1 - PTY-40033 Independent Study	
Question the professional concepts and contextual frameworks, challenge underlying assumptions and established principles of physiotherapy knowledge base.	Evidence-based practice - PTY-40002	
Integrate core scientific knowledge with the professional practice of physiotherapy	Dynamic Ultrasound Imaging - PTY-40034 Applied Clinical Anatomy 1 - PTY-40033	
Challenge, evaluate, modify, develop the theory and the practice of physiotherapy	Evidence-based practice - PTY-40002 Assistive Technologies in Neuromuscular Rehabilitation - PTY-40035 Independent Study	
Plan, implement and document a piece of original research addressing ethical and professional issues as appropriate	Masters Dissertation in Faculty of Health - PTY- 40044	

Key or Transferable Skills (graduate attributes)		
Learning Outcome	Module in which this is delivered	
Communicate effectively with a wide range of individuals using a variety of means	All modules	
Evaluate his/her own academic, professional and health care practice	All modules	
Practice and promote continuing professional development (CPD)	All modules	
Take responsibility for personal and professional learning and development	All modules	
Identify own learning needs and means of achieving them	All modules	
Enhance, update and develop appropriate knowledge and skills, balancing own needs with available resources	All modules	
Share and disseminate personal knowledge and skills gained to colleagues	All modules	
Develop information management skill e.g. IT skills	All modules	

8. Final and intermediate awards

Master's Degree	180 credits	180 credits achieved in postgraduate certificate and postgraduate diploma modules and the Dissertation
Postgraduate Diploma		120 credits achieved in postgraduate certificate modules, comprising of (in addition to the PG Cert): 15 credits in Leadership and Management or Education related module (from the Faculty, FMHS); 15 credits from a specialist route module; and 30 credits from optional modules.
Postgraduate Certificate	60 credits	60 credits achieved in Research Methods in Health, Applied Clinical Anatomy 1, Physiology of the Neuromuscular Tissue and 15 credits from optional specialist modules.

If a student, after completing their studies, only achieves 60 level 7 credits from any modules within the programme (excepting the Dissertation) they can be awarded a Postgraduate Certificate in Allied Health Studies.

9. How is the Programme Assessed?

The wide variety of assessment methods used on this programme at Keele reflects the broad range of knowledge and skills that are developed as you progress through the programme. Teaching staff pay particular attention to specifying clear assessment criteria and providing timely, regular and constructive feedback that helps to clarify things you did not understand and helps you to improve your performance. The following list is representative of the variety of assessment methods used on your programme:

- **Essays** these vary, depending upon the module, but they are normally 4,000 words per module in total length; there may be student choice from several questions (e.g. Psychosocial Aspect of Pain), or the essay may be based upon a case study, the student choosing aspect to focus upon in the essay (e.g. Concepts of Neurological Rehabilitation). The essay may also provide some student choice in that the student may choose a particular topic upon which to centre the essay (e.g. Applied Clinical Anatomy 1). All essays will test the student's ability to support the discussion with relevant literature, which is critically appraised, and to integrate and synthesize arguments in relation to the essay question.
- Reflective assignments topics may also be negotiated between student and tutor, and take the

form of a reflective piece of work in an area of the student's professional interest (e.g. Independent Study). Reflective case studies may be used in some option modules). These assignments enable the student to develop skills of reflective learning and reflective practice; these are fundamental skills used by all health care professionals as part of their continuing professional development.

- Portfolios these may consist of a range of different pieces of work but routinely include a
 requirement that students provide some evidence of critical reflection of the development of their own
 learning, also their clinical practice. In negotiation with a tutor, the student will compile a sequence of
 material to demonstrate the negotiated learning outcomes of the module, and this may include
 experiential learning, critical incidents, reflective practice etc. all in relation to an area of the student's
 professional and personal interest (e.g. for the Independent Study module). Other option modules may
 also use portfolios to demonstrate evidence of student learning in the relevant clinical field (e.g.
 Principles and Practice of Joint and Soft Tissue Injection, Introducing Acupuncture)
- **Presentations** these are oral and students would be expected to utilize relevant findings from the literature to support their argument. This form of assessment may be chosen by the student instead of a written essay, although similar subject matter would be covered. The presentation in the module Assistive Technologies in Neuromuscular Rehabilitation includes time for questions and discussion. The core module Applied Clinical Anatomy 1 also allows students to choose to present a topic rather than submit a written essay. Presentations allow students to develop their communication skills (e.g. verbal and IT skills), to present an argument in a logical way and to deal with questions effectively
- **Practical Examinations** these occur in some modules which involve the teaching and learning of practical clinical skills (e.g. option modules such as Essentials of Manual Therapy Assessment, Introducing Acupuncture). The core module Applied Clinical Anatomy 1 also has an interactive practical examination as one of its choices of assessment. These examinations enable students to demonstrate the safe and effective application of practical clinical skills, and to justify their choice
- **Dissertation** this is a student led piece of independent research of 15,000 words in length. The process, which includes gaining ethical approval from the Student Project Ethics Committee (SPEC) within the School of Allied Health Professions or other appropriate ethics committee, is supported throughout by small group workshops, also by an individual supervisor. This assessment develops student's practical research skills, and enables him/her to design and carry out a piece of research to answer a clinically relevant question in the field of physiotherapy. This work may also include a modified systematic review of literature, a clinical audit, or a service evaluation. It also develops the student's IT skills in use of various software for presentation and data analysis (e.g. Word, Excel, SPSS)

Marks are awarded for 'summative assessments' which assess students' achievement of the learning outcomes of the module. Students are also assessed 'formatively' during the module and this enables them to monitor their own progress and to assist staff in addressing any specific learning needs. Formative assessment is not formally marked; however, feedback on various aspects of the student's work and their assignment preparation is given during the course of every module on the programme, both core and option modules. Feedback happens, for example, during discussion and 'blog' sessions online, when students and staff may all contribute; it also occurs during small group workshops when staff may contribute to plenary sessions. Feedback is also provided during the course of student preparation for assessed work and during tutorial sessions. Detailed feedback is also provided on all summative assessments when these are returned to the students, and students may additionally arrange Academic Mentorials if they require further clarification or feedback in relation to assessed work.

10. Accreditation

This programme does not have accreditation from an external body.

11. University Regulations

The University Regulations form the framework for learning, teaching and assessment and other aspects of the student experience. Further information about the University Regulations can be found at: http://www.keele.ac.uk/student-agreement/

If this programme has any exemptions, variations or additions to the University Regulations these will be detailed in an Annex at the end of this document titled 'Programme-specific regulations'.

12. What are the typical admission requirements for the Programme?

See the relevant course page on the website for the admission requirements relevant to this programme: https://www.keele.ac.uk/study/.

Applicants are required to have:

• A first or second-class honours degree (2:1 or 2:2) in Physiotherapy

Please note: There may be specific requirements for particular modules such as:

- Evidence that you are currently in clinical practice
- Written support from line manager
- · Named clinical mentor
- Registration with professional governing body
- Proof of up to date personal indemnity insurance

English for Academic Purposes

Please note: All new international students entering the university will sit a diagnostic language assessment. Using this assessment, the Language Centre may allocate you to an English language module which will become compulsory. *NB*: students can take an EAP module only with the approval of the English Language Programme Director and are not able to take any other Language modules in the same academic year.

Recognition of Prior Learning (RPL)

Students can apply for RPL normally against optional modules, providing the study fits in with the philosophy of the programme and is equivalent to the level and student effort. This is reviewed by the university, the programme team and external examiner and goes to examination boards for recognition of credits toward an award.

Please see the link for further details:

https://www.keele.ac.uk/ga/programmesandmodules/accreditationofpriorlearning/

13. How are students supported on the programme?

Mechanisms of Student Support in the School of Allied Health Professions (SAHP) for Postgraduate students

(in addition to University systems in place for student support such as the Language Centre, Student Support Service, Counselling Service, International Student Support, Library support from the Health Librarian, Chaplains and other religious leaders, etc.)

All support for all students on the programme is available face-to-face during an individual meeting, or can also be undertaken via MS Teams, telephone or e-mail (many students live at a long distance from Keele, and are usually working full- time (e.g. as health care professionals) whilst working on their Master's Degree, or individual modules). Students are fully informed, at the Induction Day for all programmes, which happens at the start of each semester in the School of Allied Health Professions, and also the start of each module, about support systems available for them

The School of Allied Health Professions offers (at no extra cost to each student) a specifically tailored package from the Language Centre to support all students for their presentation and written work and assignment preparation; this programme is available at the beginning of each academic year.

Academic Mentor System (pastoral and academic advice)

• All students are allocated an academic mentor who will maintain regular contact with the student (as per the Code of Practice for Academic Mentoring). The academic mentor acts as the first point of contact for students on any issues which might affect their learning. The academic mentor can refer the student on to a wide range of specialist health, welfare, and financial services coordinated by the University's Student Services Centre. Students may request a change of academic mentor if they wish.

Academic Staff providing academic advice, also pastoral support

- Programme Director and Programme Leaders and Module Leaders frequently provide advice to students about module choices, progress issues, and often are involved in a pastoral role
- All members of the postgraduate team provide ongoing tutorial support for all students when requested, to support learning, to give individual feedback on assessments, and also for pastoral issues
- Programme Leaders, Module Leaders and the Director of Education will give advice about choosing option modules for this programme
- Formal Academic Progress Review is available for any students who wish to undertake a review or who are specifically identified by the course team as requiring an individual meeting with tutors

Support for International Students (in the School of Allied Health Professions - this in addition to University International Student Support)

- The admissions tutors are fully cognisant of the needs of all students, including international students, and support is given both prior to arrival (telephone advisory interviews, also face-to-face advisory interviews during international visits), and whilst the student is studying with us in the School of Allied Health Professions
- The admissions tutors are members of the postgraduate teaching team

- We consider this process to be an important role as we are very aware of the particular challenges
 which face students coming to the UK from cultures and educational systems which may be very
 different from those in the UK
- There is an induction week for international postgraduates, giving information on academic
 requirements, support and other facilities, as well as allowing students to settle in at Keele and sort out
 practical issues before the start of teaching. The International Student Support Officer is available to
 help international students with any questions or issues they might have.

Other mechanisms for support in the clinical area

- Joint and Soft Tissue Injection Therapy students will be supported in the workplace by a clinical mentor who has signed an agreement letter being fully cognizant of their requirements as outlined in the mentors' handbook.
- Musculoskeletal Management at the Interface students not undertaking this module in their own place
 of work will be required to produce current evidence of all mandatory training within their own
 organization including Cardio-Pulmonary Resuscitation/Basic Life Support, Infection Control, Manual
 Handling, and Fire and Health and Safety. Additionally they will be required to sign and abide by an
 honorary contract.

Support for students with a disability

 The Disability Student Support Tutor for the School of Allied Health Professions is also available to support students with any specific disability issues

14. Learning Resources

The programme is taught mainly in modern teaching rooms in the School of Allied Health Professions, all of which are equipped with computers, internet access and electronic whiteboards and/or projection equipment. Rooms are designed to be flexible and can be used for larger groups, also more informally for small groups working together.

The learning resources available to students on the programme include:

- An extensive collection of materials relevant to postgraduate study held in both the main University
 Library on Keele campus, and in the Health Library on the campus of the Royal Stoke Hospital site
 (University Hospital of North Midlands). A number of relevant journals are also accessible online to all
 registered students, and are accessible from anywhere in the world with a university username and
 password
- The Keele Learning Environment (KLE) provides easy access to a wide range of learning resources including lecture notes and presentations, discussion boards and blogs enabling students and tutors to discuss topics, all information about the programme and all modules, and other materials designed specifically for particular modules (e.g. the core / optional module, Evidence-Based Practice, is delivered entirely online, and all support materials are thus available online).
- The School of Allied Health Professions has a large range of relevant teaching materials available to all courses including a wide range of anatomical models, access to normally restricted websites related to anatomical, physiological, pathological and pharmacological information, video and DVD materials, electrotherapy equipment, and a wide range of equipment related to exercise therapy, motor control and performance stability, including small apparatus, and adjustable plinths. Various pieces of specialized exercise testing equipment are also available (e.g. gas analysis, cycle ergometer, treadmill, sensory testing kits, heart rate monitors, video, etc.)
- Specialist equipment is available for the use in specific option postgraduate modules, for example, to support the practical sessions in Essentials of Manual Therapy Assessment, Acute Respiratory Deterioration and Critical Care, Assistive Technologies in Neuromuscular Rehabilitation, and Introducing Acupuncture modules. This may include access to our Motion Analysis Lab, functional electrical stimulation devices, and simulation models and environments on campus.
- Computers for student use are situated in both the main Campus Library and in the Health Library.

15. Other Learning Opportunities

During all modules in the programme, students have the opportunity to hear from and talk to a range of guest speakers, many of whom are experts in their field at national and International level. During practical classes also on clinical sites for some modules, students are taught and mentored by highly experienced tutors and practitioners.

16. Additional Costs

As to be expected there will be additional costs for inter-library loans and potential overdue library fines, print and graduation. We do not anticipate any further costs for this programme.

17. Quality management and enhancement

The quality and standards of learning in this programme are subject to a continuous process of monitoring, review and enhancement.

- The School Education Committee is responsible for reviewing and monitoring quality management and enhancement procedures and activities across the School.
- Individual modules and the programme as a whole are reviewed and enhanced every year in the annual programme review which takes place at the end of the academic year.
- The programmes are run in accordance with the University's Quality Assurance procedures and are subject to periodic reviews under the Revalidation process.

Student evaluation of, and feedback on, the quality of learning on every module takes place every year using a variety of different methods:

- The results of student evaluations of all modules are reported to module leaders and reviewed by the Programme Committee as part of annual programme review.
- Findings related to the programme from the annual Postgraduate Taught Experience Survey (PTES), and from regular surveys of the student experience conducted by the University, are subjected to careful analysis and a planned response at programme and School level.
- Feedback received from representatives of students on the programme is considered and acted on at regular meetings of the Student Staff Voice Committee.

The University appoints senior members of academic staff from other universities to act as external examiners on all programmes. They are responsible for:

- Approving examination questions
- · Confirming all marks which contribute to a student's degree
- Reviewing and giving advice on the structure and content of the programme and assessment procedures

Information about current external examiner(s) can be found here: http://www.keele.ac.uk/ga/externalexaminers/currentexternalexaminers/

18. The principles of programme design

The programme described in this document has been drawn up with reference to, and in accordance with the guidance set out in, the following documents:

- **a.** UK Quality Code for Higher Education, Quality Assurance Agency for Higher Education: http://www.qaa.ac.uk/quality-code
- **b.** Keele University Regulations and Guidance for Students and Staff: http://www.keele.ac.uk/regulations
- **c.** Quality Assurance Standards (2013) Chartered Society of Physiotherapy:

http://www.csp.org.uk/publications/quality-assurance-standards
