

Programme Specification: Undergraduate

For Academic Year 2026/27

1. Course Summary

Names of programme and award title(s)	BSc (Hons) Forensic Science BSc (Hons) Forensic Science with International Year (see Annex for details) BSc (Hons) Forensic Science with Work Placement Year (see Annex for details)
Award type	Combined Honours
Mode of study	Full-time
Framework of Higher Education Qualification (FHEQ) level of final award	Level 6
Normal length of the programme	3 years; 4 years with either the International Year or Placement Year between years 2 and 3
Maximum period of registration	The normal length as specified above plus 3 years
Location of study	Keele Campus
Accreditation (if applicable)	This programme is recognised by the Chartered Society of Forensic Sciences. For further details see the section on Accreditation.
Regulator	Office for Students (OfS)
Tuition Fees	<p>UK students:</p> <p>Fee for 2024/25 is £9,250*</p> <p>International students:</p> <p>Fee for 2024/25 is £20,700**</p> <p>The fee for the international year abroad is calculated at 15% of the standard year fee</p> <p>The fee for the work placement year is calculated at 20% of the standard year fee</p>

How this information might change: Please read the important information at <http://www.keele.ac.uk/student-agreement/>. This explains how and why we may need to make changes to the information provided in this document and to help you understand how we will communicate with you if this happens.

* These fees are regulated by Government. We reserve the right to increase fees in subsequent years of study in response to changes in government policy and/or changes to the law. If permitted by such change in policy or law, we may increase your fees by an inflationary amount or such other measure as required by government policy or the law. Please refer to the accompanying Student Terms & Conditions. Further information on fees can be found at <http://www.keele.ac.uk/studentfunding/tuitionfees/>

** These fees are for new students. We reserve the right to increase fees in subsequent years of study by an inflationary amount. Please refer to the accompanying Student Terms & Conditions for full details. Further information on fees can be found at <http://www.keele.ac.uk/studentfunding/tuitionfees/>

2. What is a Combined Honours programme?

NB: all students who study a science Principal subject are candidates for the degree of Bachelor of Science (with Honours) (BSc Hons) irrespective of their second Principal subject.

Combined Honours degrees are degrees that are taken in two different subjects, resulting in an X and Y degree title. If you are taking a Combined Honours programme, these will be the two subjects you applied for. These are referred to as your Principal Subjects.

In a Combined Honours degree you must take at least 135 credits in each Principal Subject (270 credits in total), accrued over all three levels of study, with at least 45 credits at each level of study (Levels 4, 5 and 6) in each of two Principal Subjects (90 credits per year). The remaining available credits can be filled with modules from these subjects or other subjects entirely.

As a Combined Honours student you can choose to study just one subject in your final year of study, taking a minimum of 90 credits in this subject. This will result in an X with Y degree title.

3. Overview of the Programme

The BSc Forensic Science programme has been designed to provide you with an understanding of the subject from the crime scene to the court so you are fully prepared for your future career. During your studies on this programme, you will cover areas such as forensic chemistry and crime scene investigation to name a few. There is also the option to personalise your degree to your own particular interests or career aspirations by following one of our specialised pathways. Employability is at the heart of this programme. In addition to tailoring your studies, you will gain a significant amount of hands on experience both in the crime scene and the laboratory.

You will gain hands-on practical experience with a [wide range of equipment and techniques](#) working with professional and research grade instrumentation. The teaching laboratories for forensic science are well equipped with high quality standard laboratory facilities and modern forensic science and analytical instrumentation. There are also dedicated crime scene simulation facilities which include both [domestic and non-domestic](#) indoor scenarios, and outdoor crime scenes, vehicle and [fire](#) examination and a dedicated [outdoor taphonomy facility](#) used for teaching and research projects. You will also gain experience by use of outdoor [Faculty equipment](#) for search and recovery work.

You will be taught by [academic staff](#) who are research active in the differing forensic science specialties and in developing forensic science education, as well as by specialist forensic science practitioners who have previously worked as crime scene investigators, forensic search specialists and in forensic science laboratories. This will prove particularly beneficial in your final year independent research project which is a highlight of your course. You will also have external guest lecturers providing you current knowledge and understanding in specialist areas throughout your studies. You will also be supported by an Academic Mentor throughout your course.

Forensic Science skills development and graduate attributes are embedded throughout the course, which include a wide range of transferrable skills, through extensive use of problem-based and team-based learning, ability to progress through forensic science investigations to produce professional reports and defend them in court, to research skills via the independent research project that you will undertake in the final year of the programme, as well as the opportunity to go on work or education placements.

4. Aims of the programme

The broad aims of the programme are informed by the [QAA Benchmark Statement for Forensic Science](#), to satisfy the [Chartered Society of Forensic Science](#) Recognised status and to embed Keele [curriculum expectations and graduate attributes](#), which are under the following generic categories:

Academic Knowledge and expertise

- engender and develop an enthusiasm for forensic science and provide an intellectually stimulating and beneficial learning experience
- enable development of a deep academic **subject knowledge** and experience of **interdisciplinary experience** and techniques relevant to forensic science to master's level
- foster **critical thinking**, awareness of and engagement with current forensic science methods and techniques within forensic science, some of which are at, or informed by, the forefront of the discipline

Professional skills

- develop practical, analytical, **problem-solving** and **numeracy and data literacy** skills, exploring new approaches to solving problems, within forensic science, to Degree level
- develop **digital readiness**, literate, written and oral reporting skills to a level appropriate to the professional forensic scientist and the ability to convey scientific outcomes to non-scientists
- engender a sound understanding of continuity of evidence and how the forensic crime scene, the laboratory and the court contribute to the forensic and legal process

- **research skills** of devising, planning, executing and reporting on an original investigation or research project within the discipline, both as an individual and as part of a team
- **reflective practice** and **career management**

Personal effectiveness

- develop **leadership, communication** and **time management** skills, **collaborate** as part of a team,
- become **adaptable, resilient, self-aware** and **empathetic** of others

Social and ethical responsibility

- recognise and respect **equality, diversity and inclusion**, acting **ethically** with **integrity and respect**
- developing **sustainability** knowledge and skills and aware of **global issues** and challenges.

5. What you will learn

The intended learning outcomes of the programme (what students should know, understand and be able to do at the end of the programme), can be described under the following headings:

- Subject knowledge and understanding
- Subject specific skills
- Key or transferable skills (including employability skills)

Subject knowledge and understanding

Successful students will be able to demonstrate knowledge and understanding of:

- the principles of forensic chemistry, analytical science, crime scene investigation, explosives and arson
- selected topics in forensic science and possess competence in applying these principles to appropriate areas of the discipline.
- a wide range of instrumental and other techniques relevant to forensic science and use them competently to analyse a range of relevant materials and with regard to quality assurance issues
- problem-solving within forensic science by drawing on their scientific understanding and knowledge, and experience of experimental techniques
- an awareness of and engagement with current methods and techniques within forensic science, some of which are at, or informed by, the forefront of the discipline
- the place of forensic science within the legal framework and the role of the expert witness in court
- the research literature across forensic science, use it to advance their understanding and apply it in practice
- the legal and ethical issues which constrain the practice of the professional forensic scientist including ISO accreditation in the UK.

Subject specific skills

Successful students will be able to:

- execute practical work and critically analyse the results from experiments or investigations and draw valid conclusions.
- interpret and evaluate the significance of the results of a forensic investigation in the context of the circumstances of the crime, using appropriate statistical tools
- prepare written reports following formats used by crime scene personnel including crime scene reports, strategies, and statements and defend it under cross-examination in a court setting.
- research, devise, plan, execute and report on an original investigation or research project within the discipline, both as an individual and as part of a team
- work safely in the laboratory and manage risk assessments and other practices in a competent fashion.
- select and utilise appropriate software, databases and other digital resources for the analysis and interpretation of instrumental and other laboratory data

Key or transferable skills (including employability skills)

Successful students will be able to:

- solve familiar, unfamiliar and complex problems with self-direction and originality, by clearly formulating the problem, identifying the key issues and generating different approaches to its solution
- analyse, synthesise and summarise data and information critically and appreciate its limitations
- assess the merits of contrasting theories, explanations and strategies
- make critical judgements by acquiring a range of evidence and information then formulating and testing hypotheses
- present complex concepts and information in a clear and concise manner, both orally, in writing and by other means and to interact and communicate effectively within a wide range of professional environments,

- including to non-scientific audiences
- work both independently and as part of a team, to plan, organise and perform work efficiently and conscientiously in a timely way, and meet appropriate deadlines
- take responsibility for their own learning and develop a habit of critical reflection upon that learning
- utilise a wide range of ICT skills, including the use of databases, software packages and modern methods of communication
- work within an ethical framework and according to ethical, honest and acceptable practices
- develop confidence in their own understanding and skills as well as a self-critical attitude to their own work and achievements
- develop an adaptable and flexible approach to study, work and work-life balance
- identify and work towards targets for ongoing professional development

Keele Graduate attributes

The Keele Graduate Attributes are the qualities (skills, values and mindsets) which you will have the opportunity to develop during your time at Keele through both the formal curriculum and also through co- and extra-curricular activities (e.g., work experience, and engagement with the wider University community such as acting as ambassadors, volunteering, peer mentoring, student representation, membership and leadership of clubs and societies). Our Graduate Attributes consist of four themes: **academic expertise, professional skills, personal effectiveness, and social, environmental and ethical responsibility**. You will have opportunities to engage actively with the range of attributes throughout your time at Keele: through your academic studies, through self-assessing your own strengths, weaknesses, and development needs, and by setting personal development goals. You will have opportunities to discuss your progress in developing graduate attributes with, for example, Academic Mentors, to prepare for your future career and lives beyond Keele.

6. How is the programme taught?

Our programme is delivered with an emphasis on live, in-person, interactive sessions, supported by online materials on the KLE allowing flexible engagement. The Keele University extensive campus provides an unrivalled grounds to offer an abundance of opportunities for specialist indoor and outdoor simulation, research projects and specialist equipment for students to utilise (see later). Students are also provided with regular opportunities to talk through particular areas of difficulty, and any special learning needs they may have, with their Academic Mentors or module lecturers on a one-to-one basis. You will also have some course optionality through module options throughout your studies allowing you to choose in areas such as forensic chemistry, forensic biology, crime scene investigation.

1st Year:

Academic content is predominantly taught through interactively through a mixture of interactive lectures and laboratory activities. Forensic Science is a laboratory-based discipline and practical work is closely tied to the lectures, thus enabling students to gain competence and confidence in the investigation and analysis of forensic evidence, using laboratory instrumentation as well as developing a critical awareness of the range of techniques available, their capabilities and limitations. Students working in the laboratory gain an understanding of health and safety issues, manage risk assessments, maintaining accurate and informative laboratory notes and working with others in a safe and productive fashion. In a similar way, through small-group, tutor-guided exercises and team-led investigations in simulated casework scenarios, students apply the principles and procedures of crime scene investigation to novel incidents, develop practical skills and learn how to implement a forensic strategy and ensure a rigorous chain of custody.

2nd Year:

Teaching styles continue from first year with interactive lectures supported by problem classes, laboratory practicals, crime scene investigation sessions and tutorials. Practical classes include scripted laboratory sessions developing more advanced techniques and hands-on experience of a range of analytical instruments. Investigative group work is developed through an analytical project. Professional skills are developed with a focus on forensic science practical and theoretical knowledge to give you knowledge and understanding of these career-relevant skills. Choice is also available of different option modules, depending on your area(s) of interest.

3rd Year:

A highlight of our 3rd year is the independent research project. Rather than scripted labs, you will collaborate with an academic member of staff to develop and complete your project spread over both semesters. Laboratory work, if appropriate, takes place in both teaching labs or outdoors, depending on the chosen project, with expert supervision. Further practical work is taught through laboratory sessions and PC labs involving hands-on experience of a wide range of research grade analytical instruments. Fewer contact hours provide more time for independent work, and the ability to specialise in your preferred areas of forensic science and criminology through a series of assessment items allowing a bespoke choice of subject. Choice is also available of different option modules, depending on your area(s) of interest.

Apart from these formal activities, students are also provided with regular opportunities to talk through

particular areas of difficulty, and any special learning needs they may have, with their Academic Mentors or module lecturers on a one-to-one basis. You are also invited to attend our Forensic Sciences Careers Series in which you will experience speakers from academia and industry presenting material at the forefront of current scientific knowledge and potentially where you can go with your degree.

7. Teaching Staff

- The Forensic Science academic staff have expertise and interests across the full spectrum of forensic science or related disciplines. All staff are active in research or scholarship and details can be found on the school web page at <https://www.keele.ac.uk/scps/forensicscience/ourpeople/>

There are a number of additional guest lecturers from the profession who contribute either a single or a short series of lectures, workshops or practical classes across the programme in topics such as crime scene examination, fire scene investigation and forensic toxicology. Most academic staff are active researchers in the forensic, analytical and chemical sciences and many have a distinguished track record in publication, the generation of grant income, industrial collaboration and as research journal reviewers. A strength of the programme lies in our specialist forensic science practitioners who bring their wealth of real-world experience and case work to the teaching of Forensic Science. We have experts who previously worked as crime scene investigators, digital forensics officers, or in accredited forensic science laboratories whose expertise informs current best practice in forensic science, and whose extensive contacts bring in outside experts to enhance the student experience and understanding of contemporary Forensic topics.

Many current teaching staff hold or are working towards an accredited Higher Education Teaching qualification and many are Fellows (FHEA) or Senior Fellows (SFHEA) of the Higher Education Academy, the professional body for teachers in Higher Education. Our staff regularly make scholarly contributions to national education conferences, journals and books, as well as attract funding for teaching innovation projects, on topics spanning authentic assessment, embedding technology in teaching, team-based and active learning, gamification and induction to HE, among others. Several of the teaching staff have established a national reputation for excellence in teaching and learning and have been recognised for their innovation in teaching through national teaching awards, for example:

- RSC Team Prize for Excellence in Higher Education
- AdvanceHE Collaborative Award for Teaching Excellence

The University will attempt to minimise changes to our core teaching teams, however, delivery of the programme depends on having a sufficient number of staff with the relevant expertise to ensure that the programme is taught to the appropriate academic standard.

Staff turnover, for example where key members of staff leave, fall ill or go on research leave, may result in changes to the programme's content. The University will endeavour to ensure that any impact on students is limited if such changes occur.

8. What is the structure of the Programme?

The academic year runs from September to June and is divided into two semesters. The number of weeks of teaching will vary from course to course, but you can generally expect to attend scheduled teaching sessions between the end of September and mid-December, and from mid-January to the end of April. Our degree courses are organised into modules. Each module is usually a self-contained unit of study and each is usually assessed separately with the award of credits on the basis of 1 credit = 10 hours of student effort. An outline of the structure of the programme is provided in the tables below.

There are two types of module delivered as part of your programme. They are:

- Compulsory modules - a module that you are required to study on this course;
- Optional modules - these allow you some limited choice of what to study from a list of modules.

Modern Language modules: You are able to take up to 60 credits across your degree programme as Faculty Funded additional Modern Language modules in order to graduate with the Enhanced Degree Title. [Please see [link](#) for more information on Enhanced degree titles.]

For further information on the content of modules currently offered, please visit: <https://www.keele.ac.uk/recordsandexams/modulecatalogue/>

A summary of the credit requirements per year is as follows.

Year	Compulsory	Optional	
		Min	Max
Level 6	45	15	15

In year 3 there is the option to choose to specialise in one of your subjects, taking a minimum of 90 credits in this subject rather than taking modules from both subjects.

Module Lists

Level 6

For students specialising in this subject at Level 6, a minimum of 90 credits must be taken in this subject (see the lower tables of compulsory and optional modules below). For students specialising in another subject, the first list should be used.

Compulsory modules	Module Code	Credits	Period
Explosives, Arson and Evidence	FSC-30043	15	Semester 1
Forensic Science Research Project (15 credit)	FSC-30025	15	Semester 1-2
Forensic Toxicology: Ingestion to Detection	FSC-30039	15	Semester 2

Optional modules	Module Code	Credits	Period
Marks and Traces Examination	FSC-30053	15	Semester 1
Topics in Forensic Biology	FSC-30061	15	Semester 1
Flexible Work Placement (Level 6)	NAT-30008	15	Semester 1-2
Professional Experience in Education	NAT-30012	15	Semester 1-2
Environmental and Wildlife Forensics	FSC-30029	15	Semester 2
Forensic Chemical Analysis: Instrumentation and Evaluation	FSC-30055	15	Semester 2

If you choose to specialise in this subject in your final year you will study the following modules:

Compulsory modules	Module Code	Credits	Period
Explosives, Arson and Evidence	FSC-30043	15	Semester 1
Forensic Science Research Project (30 credit)	FSC-30021	30	Semester 1-2
Crime Scene to Court	FSC-30049	30	Semester 1-2
Forensic Toxicology: Ingestion to Detection	FSC-30039	15	Semester 2

Optional modules	Module Code	Credits	Period
Advanced Digital Forensics	FSC-30035	15	Semester 1
Marks and Traces Examination	FSC-30053	15	Semester 1
Topics in Forensic Biology	FSC-30061	15	Semester 1
Flexible Work Placement (Level 6)	NAT-30008	15	Semester 1-2
Professional Experience in Education	NAT-30012	15	Semester 1-2
Environmental and Wildlife Forensics	FSC-30029	15	Semester 2
Forensic Chemical Analysis: Instrumentation and Evaluation	FSC-30055	15	Semester 2

Level 6 Module Rules

Students can take EITHER NAT-30008 or NAT-30012 not both.

Learning Outcomes

The table below sets out what students learn in the programme and the modules in which that learning takes place. Details of how learning outcomes are assessed through these modules can be found in module specifications.

Level 6

Subject Knowledge and Understanding	
Learning Outcome	Module in which this is delivered
Forensic Science Knowledge: Describe and discuss the full breadth of key forensic science concepts confidently, accurately and in detail, using appropriate terminology, including selected aspects at the forefront of forensic science.	Forensic Science Research Project (15 credit) - FSC-30025 Environmental and Wildlife Forensics - FSC-30029 Forensic Toxicology: Ingestion to Detection - FSC-30039 Explosives, Arson and Evidence - FSC-30043 Marks and Traces Examination - FSC-30053 Forensic Chemical Analysis: Instrumentation and Evaluation - FSC-30055 Modules listed
Problem Solving: Apply knowledge, understanding and critical judgement of modern forensic science theories and practices to solve new, qualitative and quantitative problems that may be multi-layered and/or cross disciplinary in nature.	Forensic Science Research Project (15 credit) - FSC-30025 Environmental and Wildlife Forensics - FSC-30029 Forensic Toxicology: Ingestion to Detection - FSC-30039 Explosives, Arson and Evidence - FSC-30043 Marks and Traces Examination - FSC-30053 Forensic Chemical Analysis: Instrumentation and Evaluation - FSC-30055 Modules listed
Interdisciplinarity: Recognise the relationships and interfaces between forensic science and other subjects, applying forensic science concepts effectively in a multidisciplinary environment.	Forensic Science Research Project (15 credit) - FSC-30025 Environmental and Wildlife Forensics - FSC-30029 Forensic Toxicology: Ingestion to Detection - FSC-30039 Explosives, Arson and Evidence - FSC-30043 Modules listed

Subject Specific Skills	
Learning Outcome	Module in which this is delivered
Safety and Ethics: Demonstrate skills in the design and implementation of safe forensic science procedures and processes, including production of new risk assessments, COSHH documentation and/or research ethics documentation as appropriate	Forensic Science Research Project (15 credit) - FSC-30025 Environmental and Wildlife Forensics - FSC-30029 Forensic Toxicology: Ingestion to Detection - FSC-30039 Explosives, Arson and Evidence - FSC-30043 Marks and Traces Examination - FSC-30053 Forensic Chemical Analysis: Instrumentation and Evaluation - FSC-30055 Modules listed
Practical Competence: Use independent judgement to select and operate the appropriate advanced laboratory instrumentation, equipment, techniques and sampling tools to address recovery, extraction and analysis of commonly encountered trace forensic samples and analyse results from experiments or investigations to draw valid conclusions.	Forensic Science Research Project (15 credit) - FSC-30025 Environmental and Wildlife Forensics - FSC-30029 Forensic Toxicology: Ingestion to Detection - FSC-30039 Explosives, Arson and Evidence - FSC-30043 Marks and Traces Examination - FSC-30053 Forensic Chemical Analysis: Instrumentation and Evaluation - FSC-30055 Modules listed
Scientific Investigation: Plan, formulate and test original forensic science hypotheses by designing, observing, recording and interpreting data collections, professionally documenting methodologies and findings, and evaluate the results of open-ended and original scientific investigations	Forensic Science Research Project (15 credit) - FSC-30025 Forensic Toxicology: Ingestion to Detection - FSC-30039 Explosives, Arson and Evidence - FSC-30043 Marks and Traces Examination - FSC-30053 Modules listed
Data Literacy: Process, transform and critically evaluate original qualitative and quantitative datasets and use judgement informed by theory to build robust arguments based on data from complementary sources	Forensic Science Research Project (15 credit) - FSC-30025 Environmental and Wildlife Forensics - FSC-30029 Forensic Toxicology: Ingestion to Detection - FSC-30039 Explosives, Arson and Evidence - FSC-30043 Marks and Traces Examination - FSC-30053 Forensic Chemical Analysis: Instrumentation and Evaluation - FSC-30055 Modules listed

Key or Transferable Skills (graduate attributes)	
Learning Outcome	Module in which this is delivered
Research Skills: Engage with peer reviewed forensic science literature, evaluating, interpreting and synthesizing forensic science information to construct and critically evaluate scientific research	Forensic Science Research Project (15 credit) - FSC-30025 Forensic Toxicology: Ingestion to Detection - FSC-30039 Explosives, Arson and Evidence - FSC-30043 Marks and Traces Examination - FSC-30053 Modules listed
Numeracy and Digital Skills: Deploy mathematical, statistical and computational methods for data analysis to solve forensic science problems and evaluate forensic data, using a broad range of general and specialist software to investigate, interpret and manipulate forensic science information.	Forensic Science Research Project (15 credit) - FSC-30025 Environmental and Wildlife Forensics - FSC-30029 Forensic Toxicology: Ingestion to Detection - FSC-30039 Explosives, Arson and Evidence - FSC-30043 Marks and Traces Examination - FSC-30053 Forensic Chemical Analysis: Instrumentation and Evaluation - FSC-30055 Modules listed
Scientific Communication: Communicate effectively in both oral and written formats, selecting appropriate content, media and methods for the audience, purpose and subject, and using a broad range of general and specialist software to create forensic science materials for presentation.	Forensic Science Research Project (15 credit) - FSC-30025 Environmental and Wildlife Forensics - FSC-30029 Forensic Toxicology: Ingestion to Detection - FSC-30039 Explosives, Arson and Evidence - FSC-30043 Marks and Traces Examination - FSC-30053 Forensic Chemical Analysis: Instrumentation and Evaluation - FSC-30055 Modules listed
Reflective Practice and Professionalism: Demonstrate the ability to plan, review and manage progress individually and collaboratively, working successfully with others, reviewing and managing progress, prioritising tasks and meeting deadlines	Forensic Science Research Project (15 credit) - FSC-30025 Environmental and Wildlife Forensics - FSC-30029 Forensic Toxicology: Ingestion to Detection - FSC-30039 Explosives, Arson and Evidence - FSC-30043 Marks and Traces Examination - FSC-30053 Forensic Chemical Analysis: Instrumentation and Evaluation - FSC-30055 Flexible Work Placement (Level 6) - NAT-30008 Professional Experience in Education - NAT-30012 Modules listed

9. Final and intermediate awards

Credits required for each level of academic award are as follows:

Honours Degree	360 credits	<p>You will require at least 120 credits at levels 4, 5 and 6</p> <p>You must accumulate a minimum of 135 credits in each Principal Subject (270 credits in total), with at least 45 credits at each level of study (Levels 4, 5 and 6) in each of two Principal Subjects (90 credits per year). Your degree title will be 'subject X and subject Y'.</p> <p>If you choose to study one Principal subject in your final year of study a minimum of 90 credits in that subject is required. Your degree title will be 'subject X with subject Y'.</p>
Diploma in Higher Education	240 credits	You will require at least 120 credits at level 4 or higher and at least 120 credits at level 5 or higher
Certificate in Higher Education	120 credits	You will require at least 120 credits at level 4 or higher

10. How is the Programme Assessed?

The wide variety of assessment methods used on this programme at Keele reflects the broad range of knowledge and skills that are developed as you progress through the degree programme. Teaching staff pay particular attention to specifying clear assessment criteria and providing timely, regular and constructive feedback that helps to clarify things you did not understand and helps you to improve your performance. The following list is representative of the variety of assessment methods used on your programme:

- **Class tests** assess the understanding of concepts and the application of theories to solve familiar and unfamiliar problems. They also allow students to experience time-constrained assessment as well as acting to provide feedback on their progress.
- **End of module examinations, open book assessments and case work portfolios** test the ability of the student to describe, explain, and critically discuss the principles of forensic chemistry, criminalistic science, analytical science and selected topics in forensic biology and to demonstrate competence in applying these principles to applications and to solve problems from appropriate areas of the discipline
- **Problems sheets and data analysis exercises** assess the student's skills in solving numerical and other problems within forensic science by drawing on their scientific understanding and knowledge, and experience of experimental techniques

Throughout the extensive laboratory and other practical work in this programme, many types of assessment are utilised to achieve the learning outcomes.

- **Laboratory diaries (notebooks)** are used to communicate the results of work accurately and reliably and to encourage good working practice, including managing risk assessments and following safe working practices. Together with **laboratory proformas**, they allow students to demonstrate their skills in the critical analysis and interpretation of data, test the uncertainty in knowledge and show the ability to draw valid conclusions from their work
- **Laboratory reports** communicate the execution of practical work, the ability to describe the results of work accurately and reliably, with structured and coherent arguments and to enable students to evaluate the outcomes of data analysis in a critical fashion
- **Court expert witness statements** enable students to prepare a written statement of expert testimony and to understand the place of forensic science within the legal framework and the role of the expert witness in court. These reports test the student's ability to interpret and evaluate the significance of the results of a forensic investigation in the context of the circumstances of the crime, using appropriate statistical tools
- **Oral presentations, digital presentations and poster presentations** demonstrate the ability of the student to present complex concepts and information in a clear and concise manner, to interact and communicate effectively to a wide range of professional environments, including to both scientific and non-scientific audiences
- **Crime scene investigation reports** enable students to apply the principles and procedures for crime scene investigation to a scenario, to critically review data and outcomes in light of the chain of custody for evidence and the appropriate forensic strategy, to make critical judgments and to present these in a clear and concise manner
- **Essays** and the production of **technical leaflets** enable students to analyse, synthesise and summarise data and information critically, to appreciate its limitations, to assess the merits of contrasting theories, explanations and strategies and to present, in writing, complex concepts and information in a clear and

concise manner

- **Dissertation and research paper / literature / critical reviews** enable the student to demonstrate their effective engagement with the research literature across forensic and analytical science and use it to advance their understanding. In this way, the assessment may test their awareness of, and engagement with, current methods and techniques within the forensic and analytical sciences, some of which are at, or informed by, the forefront of the discipline. These assessments enable the student to present complex concepts and information in a clear and concise manner in writing, and to communicate effectively to a wide range of scientific and professional environments
- **Project plans**, team project interviews and viva examinations test the student's skills in working both independently and as part of a team, in planning, organising and carrying out practical and other work efficiently, including making appropriate ethical assessments, and meeting appropriate deadlines
- **Project reports** demonstrate how the student has taken responsibility for their own learning, has critically assessed a wide range of techniques and methodologies relevant to the forensic and analytical sciences and used them competently to analyse relevant materials and has selected and utilised appropriate software, databases and other digital resources for the analysis and interpretation of laboratory data. The report also tests the student's achievement in presenting complex concepts and information in a clear and concise manner in writing and communicating effectively to a scientific audience
- **Presentation and cross-examination assessments** test the student's ability to interpret and evaluate the significance of the results of a forensic investigation in the context of the circumstances of the crime, to demonstrate their understanding of the place of forensic science within the legal framework and the role of the expert witness in court and test their ability to defend a written witness statement under cross-examination in a court setting

Through working on a diverse range of assessments, linked to a curriculum that is in its latter stages closely based around the professional forensic science context, the student will demonstrate confidence in their own understanding and skills as well as a self-critical attitude to their own work and achievements, an adaptable and flexible approach to study, work and work-life balance and the ability to identify and work towards targets for ongoing professional development.

Marks are awarded for summative assessments designed to assess your achievement of learning outcomes. You will also be assessed formatively to enable you to monitor your own progress and to assist staff in identifying and addressing any specific learning needs. Feedback, including guidance on how you can improve the quality of your work, is also provided on all summative assessments within three working weeks of submission, unless there are compelling circumstances that make this impossible, and more informally in the course of tutorial and seminar discussions.

Although there are some explicit formal exercises providing formative assessment throughout the programme, the majority of formative assessment and feedback is generated informally through a variety of tutor-led activities. For example:

- Tutor-led comments on the work in the laboratory notebook or on calculations encountered in data analysis during laboratory classes
- Tutor feedback and advice on calculations undertaken during problems classes
- Tutor-led discussions on project plans, literature reviews and project results during viva interviews
- Written formative feedback on non-summative laboratory work
- Written formative feedback provided from the tutor reading a draft of a major piece of work such as the dissertation or a project report

11. Contact Time and Expected Workload

This contact time measure is intended to provide you with an indication of the type of activity you are likely to undertake during this programme. The data is compiled based on module choices and learning patterns of students on similar programmes in previous years. Every effort is made to ensure this data is a realistic representation of what you are likely to experience, but changes to programmes, teaching methods and assessment methods mean this data is representative and not specific.

Undergraduate courses at Keele contain an element of module choice; therefore, individual students will experience a different mix of contact time and assessment types dependent upon their own individual choice of modules. The figures below are an example of activities that a student may expect on your chosen course by year stage of study. Contact time includes scheduled activities such as: lecture, seminar, tutorial, project supervision, demonstration, practical classes and labs, supervised time in labs/workshop, fieldwork and external visits. The figures are based on 1,200 hours of student effort each year for full-time students.

Activity

	Scheduled learning and teaching activities	Guided independent Study	Placements
Year 2 (Level 5)	38.3%	61.7%	0%
Year 3 (Level 6)	31.2%	67.7%	1.1%

12. Accreditation

This programme is recognised by the Chartered Society of Forensic Sciences. If you decided to specialise in Forensic Science in your final year you will receive a degree that is accredited by the Chartered Society of Forensic Sciences. Further details on the accreditation requirements for these programmes can be found on the society web page below.

The CSFS accreditation web page: <http://www.csfs.org/Accreditation>

13. University Regulations

The University Regulations form the framework for learning, teaching and assessment and other aspects of the student experience. Further information about the University Regulations can be found at: <http://www.keele.ac.uk/student-agreement/>

14. What are the typical admission requirements for the Programme?

See the relevant course page on the website for the admission requirements relevant to this programme: <https://www.keele.ac.uk/study/>

Applicants who are not currently undertaking any formal study or who have been out of formal education for more than 3 years and are not qualified to A-level or BTEC standard may be offered entry to the University's Foundation Year Programme.

Applicants for whom English is not a first language must provide evidence of a recognised qualification in English language. The minimum score for entry to the Programme is Academic IELTS 6.0 or equivalent.

English for Academic Purposes

Please note: All new international students entering the university will provide a sample of Academic English during their registration. Using this sample, the Language Centre may allocate you to an English language module which will become compulsory. This will replace any GCP modules. *NB:* students can take an EAP module only with the approval of the English Language Programme Director and are not able to take any other Language modules in the same academic year.

English Language Modules at Level 4:

- Business - ENL-90003 Academic English for Business Students (Part 1); ENL-90004 Academic English for Business Students (2)
- Science - ENL-90013 Academic English for Science Students
- General - ENL-90006 English for Academic Purposes 2; ENL-90001 English for Academic Purposes 3; ENL-90002 English for Academic Purposes 4

English Language Modules at Level 5:

- Business - ENL-90003 Academic English for Business Students (Part 1); ENL-90004 Academic English for Business Students (2)
- Science - ENL-90013 Academic English for Science Students
- General - ENL-90006 English for Academic Purposes 2; ENL-90001 English for Academic Purposes 3; ENL-90002 English for Academic Purposes 4

English Language Modules at Level 6:

- Business - ENL-90003 Academic English for Business Students (Part 1); ENL-90004 Academic English for Business Students (2); ENL-90005 Advanced Business English Communication
- Science - ENL-90013 Academic English for Science Students

- General - ENL-90006 English for Academic Purposes 2; ENL-90001 English for Academic Purposes 3; ENL-90002 English for Academic Purposes 4

Recognition of Prior Learning (RPL) is considered on a case-by-case basis and those interested should contact the Programme Director. The University's guidelines on this can be found here: <https://www.keele.ac.uk/qa/programmesandmodules/recognitionofpriorlearning/>

15. How are students supported on the programme?

Support for student learning on the Programme is provided in the following ways:

All the academic staff in Forensic Science operate an open door policy for students; in other words if they are available at any time in the working day then they are happy to discuss any matter a student raises with them; if they are not free then a future meeting will be arranged for a later time.

All students have many opportunities for close contact with the staff - through laboratory sessions, problems classes, tutorials, workshops and other teaching activities, including online sessions. Consequently, students and staff get to know each other fairly quickly and all students should feel free to approach any lecturer, module tutor or other colleagues whom they believe may be able to provide them with help and assistance on any academic issue. Feedback on formative and summative assessment is usually best obtained from the tutor who set and marked the work but after the whole semester's assessment is complete, it may be that the student's Academic Mentor is best placed to discuss their overall progress.

The Programme Directors for Forensic Science have oversight of all aspects of delivery of the Forensic Science programme. There is a School Disability Inclusion Tutor (DIT), Director of Education, and a School assigned Student Experience and Support Officer (SESO). In addition we have programme tutors in Assessments, Admissions, Engagement and Careers & Employability.

Help, support and advice are also available from each student's Academic Mentor who is allocated by the School. Academic Mentors will make contact with each student in their first few days at Keele to arrange an introductory meeting and will contact them at various key points throughout their degree to check on their progress and to determine whether any specific discussion is needed. From the student's perspective, the Academic Mentor should be seen as someone they can approach with confidence for advice on any matter whether academic or personal; if the mentors themselves cannot help directly then they know who within the university should be able to provide the help the student needs. As well as reviewing overall academic progress, the Academic Mentor can advise on general matters relating to the whole programme of study.

A Student Engagement and Retention Lead overviews the work of academic mentors across the school of chemical and physical sciences, and monitoring student attendance and engagement. They are available to provide additional guidance or to help if any problems arise with academic mentoring.

16. Learning Resources

Forensic Science at Keele is based in the Lennard-Jones and Central Science Laboratories, which houses modern, well-equipped teaching and research facilities. The teaching laboratories for forensic science are all well equipped with high quality standard laboratory facilities and modern forensic science and analytical instrumentation, with many multiple sets of commonly used techniques. There are also dedicated crime scene simulation facilities which include both domestic and non-domestic indoor scenarios, and outdoor crime scenes, vehicle examination and a dedicated taphonomy facility used for teaching and research projects.

You will gain hands-on practical experience with a [wide range of equipment and techniques](#) working with professional and research grade instrumentation. The teaching laboratories for forensic science are well equipped with high quality standard laboratory facilities and modern forensic science and analytical instrumentation. There are also dedicated crime scene simulation facilities which include both [domestic](#) and [non-domestic](#) indoor scenarios, and outdoor crime scenes, vehicle and [fire](#) examination and a dedicated [outdoor taphonomy facility](#) used for teaching and research projects. You will also gain experience by use of outdoor [Faculty equipment](#) for search and recovery work.

Indoors include: document examination equipment, such as VSC-4 and ESDA-2 instruments, many low power stereo microscopes, a comparison microscope and several specialist phase-contrast and polarising microscopes - these include variable temperature stages for glass analysis - and high resolution microspectrophotometer. Finger and palm print analysis may be undertaken on our dedicated AFIS system. There are three well-equipped dark-rooms for forensic imaging together with a range of high specification cameras. The analytical laboratories are fully equipped with multiple sets of FTIR spectrometers, UV-VIS spectrometers, fluorescence spectrometers, HPLC and GC-MS instrumentation, an NMR spectrometers, an Inductively-Coupled Plasma Optical Emission Spectrometer (ICP-OES), and Raman microscopes. Forensic Science students also have access to XRD, XRF and a scanning electron microscope (with EDX analysis). Students undertaking project work at levels 6 and 7 may have access to further analytical instrumentation within the research laboratories. Investigation scenarios are set up in the dedicated crime scene facility and a range of CSI equipment is available. Forensic biology equipment

includes a thermal cycler for PCR, electrophoresis and gel visualisation equipment, autoclaves and micro-centrifuges.

Students also have access to a wide variety of on-line databases and scientific journals, both in electronic and paper form, through the university library.

17. Other Learning Opportunities

A summary of the International Year, which is a potential option for students after completion of year 2 (Level 5), is provided in the Annex for the International Year.

Students have the opportunity to apply directly for the 4-year 'with Work Placement Year' degree programme or to transfer onto the 4.5-year degree programme at the end of Year-1 and in Year-2 at the end of Semester 1.

18. Additional Costs

Optional costs

There may be optional costs that students can choose to incur to enhance their learning experience. These are not required to complete the course. Details of these optional costs are outlined below to help you plan accordingly.

Activity	Estimated Cost
<p>Equipment - All PPE equipment (laboratory coats and glasses) are provided by the School at no cost to the student. Students will be required to have two laboratory notebooks, these are provided at no cost to the student in the induction session and can be used for multiple modules/years. Replacement items are available from the School Stores, the 2025/26 price for these are listed below:</p> <p>Laboratory Book - £1.50 Laboratory Glasses - £3.50 Laboratory Coat - £15</p> <p>Students will be required to supply appropriate writing equipment but this would be a minimal (<£10) cost. All core textbooks are available in the main University Library. To increase the availability of these resources, eBooks are also purchased alongside the printed text where available; these can be accessed through the University Library Catalogue. Additional costs may be incurred if the student wishes to purchase any book for themselves. In general we only recommend they purchase the core textbook which is available for approximately £50.</p>	<p>£60</p>

These costs have been forecast by the University as accurately as possible but may be subject to change as a result of factors outside of our control (for example, increase in costs for external services). Forecast costs are reviewed on an annual basis to ensure they remain representative. Where additional costs are in direct control of the University we will ensure increases do not exceed 5%.

Students may also incur general expenses related to university study, such as for printing, textbooks and other materials. Students who undertake a placement may be responsible for additional costs, such as travel, accommodation, and subsistence costs. For further information, please refer to the [additional costs](#) information.

19. Quality management and enhancement

The quality and standards of learning in this programme are subject to a continuous process of monitoring, review and enhancement.

- The School Education Committee is responsible for reviewing and monitoring quality management and enhancement procedures and activities across the School.
- Individual modules and the programme as a whole are reviewed and enhanced every year in the annual programme review which takes place at the end of the academic year.
- The programmes are run in accordance with the University's Quality Assurance procedures and are subject to periodic reviews under the Revalidation process.

Student evaluation of, and feedback on, the quality of learning on every module takes place every year using a variety of different methods:

- The results of student evaluations of all modules are reported to module leaders and reviewed by the

- Programme Committee as part of annual programme review.
- Findings related to the programme from the annual National Student Survey (NSS), and from regular surveys of the student experience conducted by the University, are subjected to careful analysis and a planned response at programme and School level.
- Feedback received from representatives of students in all three years of the programme is considered and acted on at regular meetings of the Student Staff Voice Committee.

The University appoints senior members of academic staff from other universities to act as external examiners on all programmes. They are responsible for:

- Approving examination questions
- Confirming all marks which contribute to a student's degree
- Reviewing and giving advice on the structure and content of the programme and assessment procedures

Information about current external examiner(s) can be found here:

<http://www.keele.ac.uk/qa/externalexaminers/currentexternalexaminers/>

20. The principles of programme design

The programme described in this document has been drawn up with reference to, and in accordance with the guidance set out in, the following documents:

- UK Quality Code for Higher Education, Quality Assurance Agency for Higher Education: <http://www.qaa.ac.uk/quality-code>
- QAA Subject Benchmark Statement: Forensic Science (2022) <https://www.qaa.ac.uk/docs/qaa/sbs/sbs-forensic-science-22.pdf>
- Keele University Regulations and Guidance for Students and Staff: <http://www.keele.ac.uk/regulations>
- Chartered Society of Forensic Science (CSFS) Recognition Scheme; Criteria and Standards; available at: <http://www.csofs.org/Accreditation>

21. Annex - International Year

Forensic Science with International Year

<p>International Year Programme</p> <p>Students registered for this Single Honours programme may either be admitted for or apply to transfer during their period of study at Level 5 to the International Year option. Students accepted onto this option will have an extra year of study (the International Year) at an international partner institution after they have completed Year 2 (Level 5) at Keele.</p> <p>Students who successfully complete both the second year (Level 5) and the International Year will be permitted to progress to Level 6. Students who fail to satisfy the examiners in respect of the International Year will normally revert to the standard programme and progress to Level 6 on that basis. The failure will be recorded on the student's final transcript.</p> <p>Study at Level 4, Level 5 and Level 6 will be as per the main body of this document. The additional detail contained in this annex will pertain solely to students registered for the International Year option.</p>
<p>International Year Programme Aims</p> <p>In addition to the programme aims specified in the main body of this document, the international year programme of study aims to provide students with:</p> <ol style="list-style-type: none"> Personal development as a student and a researcher with an appreciation of the international dimension of their subject Experience of a different culture, academically, professionally and socially
<p>Entry Requirements for the International Year</p>

Students may apply to the 4-year programme during Level 5. Admission to the International Year is subject to successful application, interview and references from appropriate staff.

The criteria to be applied are:

- Academic Performance (an average of 55% across all modules in Semester 1 at Level 5 is normally required. Places on the International Year are then conditional on achieving an average mark of 55% across all Level 5 modules. Students with up to 15 credits of re-assessment who meet the 55% requirement may progress to the International Year. Where no Semester 1 marks have been awarded performance in 1st year marks and ongoing 2nd year assessments are taken into account)
- General Aptitude (to be demonstrated by application for study abroad, interview during the 2nd semester of year 2 (Level 5), and by recommendation of the student's Academic Mentor, 1st and 2nd year tutors and programme director)

Students may not register for both an International Year and a Placement Year.

Student Support

Students will be supported whilst on the International Year via the following methods:

- Phone or Teams conversations with Study Abroad tutors, in line with recommended Academic Mentoring meeting points.
- Support from the University's Global Education Team

Learning Outcomes

In addition to the learning outcomes specified in the main text of the Programme Specification, students who complete a Keele undergraduate programme with International Year will be able to:

1. Describe, discuss and reflect upon the cultural and international differences and similarities of different learning environments
2. Discuss the benefits and challenges of global citizenship and internationalisation
3. Explain how their perspective on their academic discipline has been influenced by locating it within an international setting.
4. Reflect upon the international nature of crime and describe and discuss differences between investigative approaches taken in different countries.
5. Evaluate the merits and limitations of the different approaches taken to investigating crime in different countries.
6. Apply their experiences abroad to the specific graduate attributes associated with their Forensic Science degree.

Please note that students on Combined Honours programmes with International Year must meet the subject-specific learning outcomes for BOTH their principal subjects.

These learning outcomes will all be assessed by the submission of a satisfactory individual learning agreement, the successful completion of assessments at the partner institution and the submission of the reflective portfolio element of the international year module.

Course Regulations

Students registered for the International Year are subject to the programme-specific regulations (if any) and the University regulations. In addition, during the International Year, the following regulations will apply:

Students undertaking the International Year must complete 120 credits, which must comprise *at least 40%* in the student's discipline area.

This may impact on your choice of modules to study, for example you will have to choose certain modules to ensure you have the discipline specific credits required.

Students are barred from studying any module with significant overlap to the Level 6 modules to be studied on their return. Significant overlap with Level 5 modules previously studied should also be avoided.

Additional costs for the International Year

Tuition fees for students on the International Year will be charged at 15% of the annual tuition fees for that year of study, as set out in Section 1. The International Year can be included in your Student Finance allocation, to find out more about your personal eligibility see: www.gov.uk

Students will have to bear the costs of travelling to and from their destination university, accommodation, food and personal costs. Depending on the destination they are studying at additional costs may include visas, study permits, residence permits, and compulsory health checks. Students should expect the total costs of studying abroad be greater than if they study in the UK, information is made available from the Global Education Team throughout the process, as costs will vary depending on destination.

Students who meet external eligibility criteria may be eligible for grants as part of this programme. Students studying outside of this programme may be eligible income dependent bursaries at Keele.

Students travel on a comprehensive Keele University insurance plan, for which there are currently no additional charges. Some Governments and/or universities require additional compulsory health coverage plans; costs for this will be advised during the application process.

22. Annex - Work Placement Year

Forensic Science with Work Placement Year

Work Placement Year summary

Students registered for this programme may either be admitted for or apply to transfer during their studies to the 'with Work Placement Year' option (NB: for Combined Honours students the rules relating to the work placement year in the subject where the placement is organised are to be followed). Students accepted onto this programme will have an extra year of study (the Work Placement Year) with a relevant placement provider after they have completed Year 2 (Level 5) at Keele.

Students who successfully complete both the second year (Level 5) and the Work Placement Year will be permitted to progress to Level 6. Students who fail to satisfactorily complete the Work Placement Year will normally revert to the 3-year programme and progress to Level 6 on that basis. The failure will be recorded on the student's final transcript.

Study at Level 4, Level 5 and Level 6 will be as per the main body of this document. The additional detail contained in this annex will pertain solely to students registered for the Work Placement Year option.

Work Placement Year Programme Aims

In addition to the programme aims specified in the main body of this document, the Work Placement Year aims to provide students with:

1. the opportunity to carry out a year long work placement in the broad field of forensic science between Years 2 and 3 (Levels 5 and 6) of their degree programme. The module will be underpinned by reflective assessment, employer and tutor evaluation, and support from academic mentors.

Entry Requirements for the Work Placement Year

Students have the opportunity to apply directly for the 4-year 'with work placement year' degree programme, or to transfer onto the 4-year programme at the end of Year-1 and in Year-2 at the end of Semester 1. Students who are initially registered for the 4-year degree programme may transfer onto the 3-year degree programme at any point in time, prior to undertaking the year-long work placement. Students who fail to pass the work placement year, and those who fail to meet the minimum requirements of the work placement year module, (* or equivalent, work placement), will be automatically transferred onto the 3-year degree programme.

* We recommend where possible students undertake a placement of between 9 - 12 months on a full-time basis to maximize academic and personal growth. However, the Work Placement Year mandates a minimum of 24 weeks in duration, ideally on a full-time basis, but no less than 21 hours per week. This enables those undertaking an unpaid placement to work on a part-time basis alongside.

The criteria to be applied are:

- A good University attendance record and be in 'good academic standing'.
- To undertake the Work Placement Year, it is normally required that students must have achieved an average of 50% across all modules in Semester 1 at Level 5. Places on the Work Placement Year are then conditional on achieving an average mark of 50% across all Level 5 modules.
- Students with up to 15 credits of re-assessment who meet the 50% requirement may progress to the Work Placement Year. Where no Semester 1 marks have been awarded performance in 1st year marks and ongoing 2nd year assessments are taken into account.
- Alternatively, students may be accepted with lower grades on the discretion of the School/Faculty following an interview with the School Placements and Projects Manager, and Schools' Academic Placement Link.
- Should a placement be unpaid, as part of the formal approval process, the student will be asked to provide assurances regarding how they will support themselves financially. If this is not clear, the placement may not be approved. The student will also be signposted to appropriate funding streams they may have access to.
- Students undertaking Work placements will be expected to fully engage with the placement approval process and not begin their placement until authority to start has been granted. Students should also complete any necessary risk assessments required prior to commencing their placement and will be required to complete the online Health and Safety training hosted via Keele Careers Online.

(International students only) Due to visa requirements, it is not possible for international students who require a Tier 4 Visa to apply for direct entry onto the 4-year with Work Placement Year degree programme. Students wishing to transfer onto this programme should discuss this with their Placements and Projects Manager, and the academic tutor for the work placement year, and the Programme Lead. Students should be aware that there are visa implications for this transfer, and it is the student's responsibility to complete any and all necessary processes to be eligible for this programme. There may be additional costs, including applying for a new Visa from outside of the UK for international students associated with a transfer to the work placement programme.

Students may not register for both an International Year and a Work Placement Year.

Student Support

Students will be supported whilst on the Work Placement Year via the following methods:

- Regular contact between the student and a named member of staff who will be assigned to the student as their University supervisor. The University supervisor will be in regular contact with the student throughout the year, and be on hand to provide advice (pastoral or academic) and liaise with the Placement supervisor on the student's behalf if required.
- Two formal contacts with the student during the placement year: the University supervisor will visit the student in their placement organization at around the 5 weeks after placement has commenced, and then visit again (or conduct a telephone/video call tutorial) at around 15 weeks into the placement.
- Weekly supervision sessions will take place with the placement supervisor (or his/her nominee) throughout the duration of the placement.

Learning Outcomes

In addition to the learning outcomes specified in the main text of the Programme Specification, students who complete the 'with Work Placement Year' option will be able to:

1. apply the forensic science theories and laboratory skills learnt to real situations in the workplace to design, plan and critically evaluate workplace tasks.
2. develop key professional skills in the accurate documentation of information.
3. develop employability skills in the presentation and communication of data/information; the writing of reports; and the ability to work effectively both individually and as part of a team.
4. explain how their perspective on forensic science has been influenced by working in a forensic science workplace.

These learning outcomes will be assessed through the non-credit bearing Work Placement Year module which involves:

1. apply the forensic science theories and laboratory skills learnt to real situations in the workplace to design, plan and critically evaluate workplace tasks.
2. develop key professional skills in the accurate documentation of information.
3. develop employability skills in the presentation and communication of data/information; the writing of reports; and the ability to work effectively both individually and as part of a team.
4. explain how their perspective on forensic science has been influenced by working in a forensic science workplace.

Regulations

Students registered for the 'with Work Placement Year' option are subject to programme-specific regulations (if any) and the University regulations. In addition, during the Work Placement Year, the following regulations will apply:

- Students undertaking the Work Placement Year must successfully complete the zero-credit rated Work Placement Year module (NAT-30010)
- In order to ensure a high quality placement experience, each placement agency/provider will sign up to a placement learning agreement.
- Once a student has been accepted by a placement organisation, the student will inform their Placements and Projects Manager who will be responsible for the placement approval process, ensuring that the placement meets the professional placement year module criteria, and fulfils all health and safety criteria.
- The placement student will also sign up an agreement outlining his/her responsibilities in relation to the requirements of each organisation.

Students will be expected to behave professionally in terms of:

(i) conforming to the work practices of the organisation; and

(ii) remembering that they are representatives of the University and their actions will reflect on the School and have an impact on that organisation's willingness (or otherwise) to remain engaged with the placement.

Additional costs for the Work Placement Year

Tuition fees for students on the Work Placement Year will be charged at 20% of the annual tuition fees for that year of study, as set out in Section 1. The Work Placement Year can be included in your Student Finance allocation; to find out more about your personal eligibility see: www.gov.uk

Students will have to bear the costs of travelling to and from their placement provider, accommodation, food and personal costs. Depending on the placement provider additional costs may include parking permits, travel and transport, suitable clothing, DBS checks, and compulsory health checks.

A small stipend may be available to students from the placement provider during the placement but this will need to be explored on a placement-by-placement basis as some organisations, such as charities, may not have any extra money available. Students should budget with the assumption that their placement will be unpaid.

Eligibility for student finance will depend on the type of placement and whether it is paid or not. If it is paid, this is likely to affect student finance eligibility, however if it is voluntary and therefore unpaid, should not affect student finance eligibility. Students are required to confirm eligibility with their student finance provider.

International students who require a Tier 4 visa should check with the Immigration Compliance team prior to commencing any type of paid placement to ensure that they are not contravening their visa requirements.

23. Annex - Programme-specific regulations

Programme Regulations: BSc Forensic Science (Combined Honours)

Final Award and Award Titles	BSc Honours BSc Honours with International Year BSc Honours with Work Placement Year
Intermediate Award(s)	Diploma in Higher Education Certificate in Higher Education
Last modified	October 2024
Programme Specification	https://www.keele.ac.uk/qa/programmespecifications

The University's Academic Regulations which can be found on the Keele University website (<https://www.keele.ac.uk/regulations/>)[1] apply to and regulate the programme, other than in instances where the specific programme regulations listed below over-ride them. These programme regulations list:

- *Exemptions* which are characterised by the omission of the relevant regulation.
- *Variations* which are characterised by the replacement of part of the regulation with alternative wording.
- *Additional Requirements* which set out what additional rules that apply to students in relation to this programme.

The following **exemptions, variations** and **additional requirements** to the University regulations have been checked by Academic Services and have been approved by the Faculty Education Committee.

A) EXEMPTIONS

The clause(s) listed below describe where an exemption from the University's Academic Regulations exists:

For the whole duration of their studies, students on this Programme are exempt from the following regulations:

- **No exemptions apply.**

B) VARIATIONS

The clause(s) listed below describe where a variation from the University's Academic Regulations exists:

Variation 1: Coursework Assessment

Failure to engage appropriately with a module's coursework assessment items without good cause (that is, by failing to submit more than 50% of coursework items) may result in reassessment being denied.

Additional Requirements

The programme requirements listed below are in addition to the University's Academic Regulations:

Additional requirement 1: Practical Classes

1. Practical classes are compulsory and are an essential part in fulfilling the intended learning outcomes of modules of which they are part, and a requirement of Chartered Society of Forensic Science accreditation. Over a semester, failure to attend >70% of the laboratory/practical classes without approval, may result in failure of the relevant modules with no reassessment being offered. In addition, students must meet any ILOs related to practical sessions in each module, where appropriate. Failure to attend laboratory/practical sessions in a given module, without approval, may result in failure of the relevant modules with no reassessment being offered.

2. Any student failing to follow the health and safety guidelines in the laboratory will be asked to leave. This may include inappropriate dress, refusal to follow reasonable requests of staff, late attendance resulting in missed safety briefings, or attending under the influence of alcohol or other substances. The student will not be permitted to make up the missed session.

3. There is no opportunity to make up missed practical sessions due to timetable constraints and so the following concessions will be made available to the student:

4. the student may be given opportunity to submit assessed work based on an alternative practical session, in agreement with the module leader; with the approval of the Chemical and Physical Sciences Local Module Board, a small element of the laboratory assessment (up to 33%) may be disregarded with the final mark for the assessment being recalculated from the remaining elements.

Additional requirement 2: Transferring from another institution

Any student who is wishing to transfer to this programme from another institution, at Level 5 or above, must demonstrate that they have transferred from a programme that is accredited by The Chartered Society of Forensic Sciences. If the original programme is not accredited the student must demonstrate that they have covered the same material in their Level 4 year as would be covered at Level 4 on this programme.

[1] References to University Regulations in this document apply to the content of the University's Regulatory Framework as set out on the University website here <https://www.keele.ac.uk/regulations/>.
